## Fire Station Contract Let By the City

The City Commission opened three bids on construction of the new fire station at a special meeting held Monday night. Only one bid had been completed last week at the regular session of the commission. An extra week was given for completion of the bids in order that the two additional bids could be completed.

Bill Downing was the low bidder in the amount of $7,000.

The contract was not completed Tuesday due to the absence from the city of Mayor Andy Walsh. However, a formal contract will probably be entered into Wednesday and construction started as soon as possible.

The city recently sold the fire station and jail to Randall county, reserving the right to use the station for storage of the trucks until the new station could be completed. The office of Sheriff M. E. Cantrell was moved to the office, which was formerly used by members of the fire department.

As soon as the trucks are transferred to the new building, the large room will be remodeled and the office of Justice of the Peace B. F. Machen transferred to the building in order that the two peace officers may be closer together.

Constable Otto White is in charge of care of the jail and feeding of the prisoners. There are four prisoners in jail at the present time.

## Joe Hill Spent Few Days Here at the Home of His Parents

Joe Hill of Columbus, Ohio, was in Canyon over the weekend, visiting in the home of his parents, Dr. and Mrs. J. A. Hill. Joe is a designing engineer in a big equipment plant for airplane equipmet.

H was returing home from California where he went to advise with Douglas and other plane manufacturers. He believes that by midsummer the planes will be turned out in these plants according to the demands of the government in its stepped-up defense program.

His mother, Mrs. J. A. Hill, is improving and is able to be up much of the time.

## Grand Jury Has Returned Two Bills In Session

The grand jury was in session Monday for the second time this session. Indictments were returned against two men for driving while intoxicated. They will be tried during this term of District Court.

Judge Henry S. Bishop was here Monday from Amarillo and tried three divorce cases.

Members of the present grand jury are: Reeves Donnell, foreman; T. A. Black, Roy Byrd, Stanley Marsh, Jr., Morris Lowenstern, M. W. Lemmons, S. S. Howell, John Menke, Howard Fuqua, M. L. Kelly, L. T. Campbell, W. N. Barrick.

C. P. Shelnutt and W. F. Barnard are bailiffs.

## Former Canyon Girl In Two Pictures to Be Shown Here Soon

Mrs. Jewel Rose of Los Angeles, Calif., is shown in two pictures which will be shown at the Olympic during the coming week.

The first will be "The Jack Pot" on Jan. 17-18; and the second, "The Milkman," to be shown Jan. 21-22.

Mrs. Rose writes to The News that she appeared in minor roles in several pictures, and likes the work better than her work in radio. She sends a picture on the cast of "The Jackpot."

Mrs. Rose is the wife of Jim Rose, and the couple formerly lived east of Canyon until they moved to California.

## Panhandle District Texas Pastures to Have Training Meet

Frank Cobb of Tulia of the Panhandle District of Better Texas Pastures, Inc. has announced that W. O. Cox of Houston, executive secretary of the state organization, will hold a training school for all committeemen throughout the counties of the Panhandle on January 23 at 1 o'clock in the Herring Hotel, Amarillo.

Frank R. Phillips, district secretary of the Panhandle district, announces that the purpose of the school is to work out details concerning county organization and to try to fulfill the proclamation issued by Governor Allan Shivers last May.

**Good entertainment from beginning to end "THE JACKPOT" starring James Stewart, at OLYMPIC Thursday-Friday.**

## Chamber Will Hold Banquet on February 1st

The annual Chamber of Commerce banquet will be held on Thursday night, February 1 at the High School cafeteria.

Bob Wear, minister of the Church of Christ in Hereford, will be the speaker. Wear is president of the Kiwanis Club of Hereford and of the Toastmaster's Club He is one of the best speakers in this section of Texas.

H. R. Fulton, Jr., Cliff Mlinar and Bob Clark constitute the local committee on arrangements. Tickets for the banquet will be on sale in a few days at $2.25 each.

During the program the plaque of the Chamber to the outstanding citizen of Canyon during 1950 will be awarded. The committee in charge of this selection is composed of T. S. Stevenson, Sr. and Al Kieselbach. Representatives of the various organizations of Randall county will assist in the selection of the person to be honored in this selection.

## David Rasco Gives Impressions of the War in Korea

David Rasco, regional editor of the Amarillo Globe-News, talked on his work as war correspondent in Korea at the weekly luncheon of the Canyon Rotary Club Tuesday.

He was introduced by Jack Haley, vice president, who presided in the absence of President Jim Russell.

Rasco described his preparation for the trip and part of his experiences from September until his return by air in December. By the time he left there the fighting had reached a stalemate in North Korea, and the troops believed that they would sit there until Spring. The presence of a large number of Chinese Reds was known but it was of no concern to the troops. Many of the correspondents of British and French newspapers had left Korea thinking that the war was over for the winter.

According to the speaker, Seoul was lost in spite of its importance largely because there was loose defense around this important city. If we are going to stay in Korea Seoul is very important to us.

Rasco stated that we could evacuate our troops in a comparatively short time, which would have been impossible at Inchon, which we used in the invasion. He quoted one of the best military writers who predicted that we would stay in Korea.

By withdrawing to the Southern tip of Korea we have shortened our defense lines, making it possible to switch men quickly from one sector to another. At the same time our air force can do much damage to the Reds supply lines.

The Reds supply line consists of man power; ox carts; and beaten up trucks.

While there are many good soldiers from the United Nations, fully 90% of the force consists of American troops; and fully 95% of the supplies come from America. Supplying an army is a big task when these soldiers come from all sections of the globe. Australians are good fighters; and the Turks are fine, but had to be completely rearmed and supplied. They are hard to please when it comes to food.

General MacArthur is tops with the men. The army knows that they must fight, as the fate of captives is well known. There is no exaggeration of the fate of prisoners of war.

Refugees create a great problems to the army.

Koreans are very good soldiers. While they do not like Americans, they like the Reds less, and fear them.

W. R. (Bill) Crowe was introduced as a new meber of the Club by Dr. R. A. Neblett.

Visitors were: Dr. J. Howard Williams of Dallas; Wm. Curtis, Lynn Ann Brown of Amarillo; John L. Hammond, T. A. Black, James L. Cole of Canyon; Leon W. Dupuy, John E. Hill, Allen Early, Jr., Carl W. Franz, A. C. Attebury, J. J. Sanders, Herman Ford, J. Harry Brown, Dr. J. H. Brown, Joe C. Rogers, all of Amarillo.

On Sunday, January 14, the Simon children celerated Tony Simons' birthday with a dinner at the home of his mother, Mrs. Mary Simon. Twenty-one attended the dinner.

Mr. and Mrs. Travis White and daughter spent the week-end in the B. B. Bullard home. The Whites are moving to Lubbock soon.

Mr. and Mrs. Alton P. Goodwin are moving to Amarillo where he is employed with International Harvester Company.

Mrs. A. M. Childress of Tulia visited Monday with Mrs. Mamie Butler.

## Mrs. Alice Angel Died Wednesday at the Family Home

Mrs. Alice Lucille Angel, aged 86 years, 7 months and 16 days, died Wednesday afternoon at 6:30 o'clock at the family home following an illness of several months.

She was the widow of the late Levi Angel, who died August 2, 1919. The couple was married June 2, 1881 and moved to a farm near Groom in 1890. They moved to Canyon in 1913, which has since been the family home.

Mrs. Angel had been a member of the Christian Church for 45 years. She was a past officer of the Eastern Star Lodge.

The funeral was held Friday afternoon at 1:30 o'clock at the Christian Church, conducted by the pastor, Rev. W. R. Matsler, assisted by Rev. A. B. Haynes, Sr. Burial was at Groom, in charge of the Griggs-Warren Funeral Home.

Pall bearers were Lee Foster, Felix Pierce, L. W. Cole, K. E. Frieze, L. D. Winn, A. B. Duncan.

Survivors are four daughters, Mrs. Beulah Bell of Canyon, Mrs. Eva Chaplin of Modesto, Calif., Mrs. Clarice Baucom of Portland, Texas, Miss Irene Angel of Canyon; three sons, J. W. Angel of Groom, A. E. Angel and Morton Angel of Amarillo; two step-daughters, Mrs. Margaret Johnson of Groom and Mrs. Alice Outwater of Los Angeles; 15 grand children and 10 great grand children.

## Buffs Lost Two Games in Border Conference Play

The Buffaloes were toppled out of first place in the Border Conference Thursday night by the University of Arizona, which has been circuit champs for several years. The score was 59-53 favoring the visitors.

The Buffs took an early lead, and the Herd put up a hard battle to hold out against the visitors. Arizona passed the Buffs near the middle of the session, and was leading 34 to 29 at the end of the first period. The score had been tied six times during the first period.

The Buffs came back strong following the intermission and within five minutes the score was tied 38-38. It was not long before the visitors from Arizona drew ahead and maintained a lead due to the fact that the Buffs were unable to hit the basket during the second period, and also due to poor officiating, which drew protests from the large crowd.

**Texas Tech Wins**

The Buffaloes were defeated for a second time this week in the Border Conference when a game with Texas Tech was dropped Tuesday night by a score of 56 to 55.

The Buffs took the lead about midway of the first half and stayed in the lead until near the end of the hotly contested battle. At the half the score was 31-27, favoring the Buffs. At only one stage was the lead of the Buffs greater than four points.

During the last few minutes of play Tech staged a rally, in which the lead changed twice by one point, and then with less than half a minute to play and with one point advantage, Tech froze the ball allowing time to run out.

The Buffs were off on their basket shots as well as their charity attempts at the basket.

In a curtain raiser, the Buffalo freshmen defeated the Tech freshmen 66-60.

## Stork Specials

On January 11 a baby boy was born to Mr. and Mrs. J. G. Ponder.

Mr. and Mrs. Fred Jennings are the parents of a baby girl, Margo, born on January 15.

Mrs. Eugene Rachlis left last Wednesday after being here for the past two months with her father, Rev. J. R. Sharp. She will visit her brother and family, Dr. John T. Sharp and son, on the East coast before returning to Paris, France, where Mr. Rachlis has been with the ECA Mission of the Marshall Plan for the past year and a half.

Mr. and Mrs. W. H. McAtee returned home this week-end after spending the week with their daughter and family, Mr. and Mrs. C. N. Tippery in Lubbock. Mrs. McAtee returned to Lubbock with Mr. and Mrs. Tippery and daughters, who spent the week end in the McAtee home.

Mr. and Mrs. Leroy Price and family spent last Sunday with his parents Mr. and Mrs. Roy Price.

Mrs. Emma Frost and Mrs. Grady Ponder of Happy visited with Mrs. Rae M. Walters Sunday aftfernoon.

Miss Anita Johnigan is the new dental assistant in the Medical Dental Clinic.

## January 31 Is Final Date Tax Payment Time

January 1st is the final date for payment of 1950 taxes without penalties.

There are no discounts for payment of taxes during the month of January, but those who do not pay their taxes this month will have penalty and interest added starting on February 1st.

Poll tax payments for 1950 have been slow. Poll taxes are no longer assessed with property taxes, and therefore those who wish to be armed with a poll tax must call for this receipt before the end of January.

Since this is an off year in Texas politics, too many folks are of the opinion that there is no necessity of paying the poll tax. It is very likely that several important constitutional amendments will be submitted to the voters this year, and those who are not armed with the poll tax will not get a vote. School elections are held every year, and those who failed to secure their poll tax receipt will be deprived of a vote in this election.

All property tax payers are urged to get their poll tax receipts before the end of January.

## Drive for March of Dimes Began Here Monday

The March of Dimes for 1951 began in Randall County, as throughout the United States, on Monday, January 15, and will continue through January 31.

Randall County Director of the campaign, Mrs. C. O. Elkins, reported Tuesday afternoon that the containers to be placed in business houses had not yet arrived. They will be distributed immediately upon arrival. Mrs. Elkins states that volunteers will be in the post office and at other places around town. She also asked that all organizations make their collections and turn them in promptly.

Because of the steady three year increase in the number of polio victims, the 1951 March of Dimes Drive is being intensified and everyone is asked to give as generously as possible.

Helen Hayes, National Women's Chairman, March of Dimes, writes, "Thousands of boys and girls attacked by a crippling disease look to us for help today. Thousands more probably will need us this year.

"We are faced with the largest polio patient load in history. But here are seeds of hope. For the signs multiply that we are getting near and nearer to the conquest of infantile paralysis. We must provide every precious dollar required for the progress of research to stamp out the disease, and at the same time have enormous sums of money with which to assist every patient who needs help."

Mr. and Mrs. B. C. Taylor, Jr., and children spent the week-end with her parents, Mr. and Mrs. Foster Amburn, in Floydada.

Mrs. S. R. Hood spent last week in Plainview visiting her parents, Mr. and Mrs. W. B. Meredith.

Mr. and Mrs. Clifford Burtz were Sunday visitors in the Wayne Davis home.

## Lions Club Leads In Canyon Bowling League for Men

According to the official score in the Men's Bowling League, the Lions Club has the highest average of 742.6 per game, although the team stands second in the League.

Buffalo Barber leads the League, with three wins. The Lions Club, City Barber Shop, K. L. Pond Insurance, K. Service teams are tied for second place; with the Southwestern Public Service Co., Johnson's Men's Wear, V. F. W. and Samuelson Motor teams tied for third place.

Games scheduled for Thursday night are:

City Barber vs. Lions Club.

Southwestern Public Service vs. V. F. W.

K Service vs. Johnson's.

Pond Insurance vs. Hosea Foster Insurance.

Buffalo Barber vs. Samuelson Motors.

The Foster team is the only one which has not appeared in the tournament.

## New 1951 Car Plates Arrive at Court House

New 1951 car plates for Randall county will be in stock by the time you read this article.

However, no car owner will be able to buy a set of the new 1951 car tags before February 1st, and they may not be installed on your car until the first of March.

The law requires that all cars be equipped with the new car tags by April 1st.

## Production Dates For 'Wizard of Oz' Are Announced

January 24, 25, and 26 are the dates for "The Wizard of Oz" the initial production of the Canyon Children's Theatre, according to director Carl Michell. Matinees at 4:00 p. m. on all three dates and 7:00 p. m. evening performances on January 25 and 26 will be presented in the West Texas State Branding Iron Theatre.

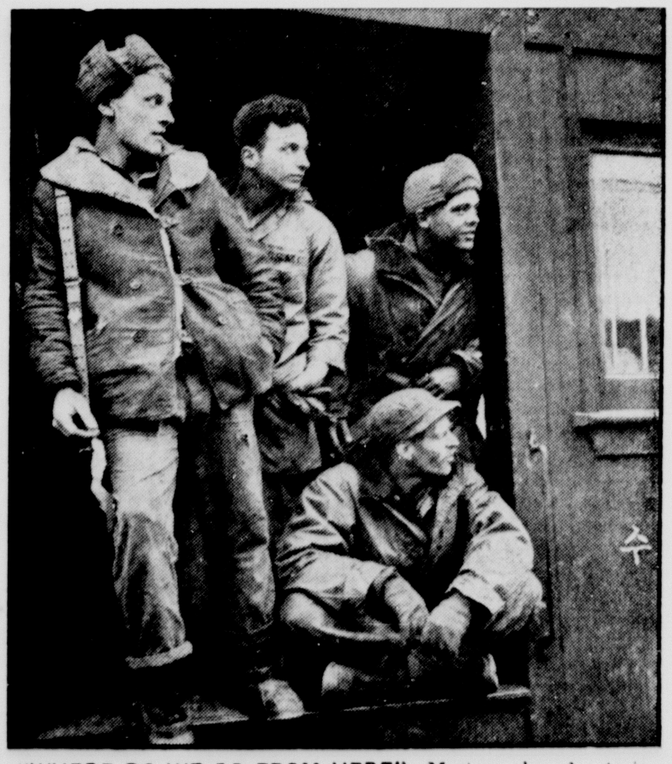

With a cast of approximately thirty children, "The Wizard of Oz," is the story of a journey through the land of Oz. Dorothy, a little girl from Kansas, is blown by a cyclone into the mystical land of Oz. There she is conducted on her journey by the tin woodsman and a scarecrow.

Smoke from New York City and a real tin suit for the tin woodsman are just two of the many special effects in the show, Michell states.

Remember the dates are January 24, 25, and 26, with admission prices of $.25 for grade school children and $.50 for other students and adults.

Mrs. Mary Maloney of Warrington, England, mother of Mrs. Wayne Butler, passed away on December 29. Mrs. Butler and son Mike, who have been in England for six months, were present at the time of Mrs. Maloney's death. Mrs. Butler and Mike will return to Canyon in approximately a month.

Mrs. O. W. Parker, Sr. of Independence, Mo., is visiting in the home of her son Mr. and Mrs. O. W. Parker, Jr. and Karen Sue.

"WHERE DO WE GO FROM HERE"—Marines aboard a train at a South Korean port watched the landscape slip slowly past with mixed emotions. The Leathernecks were bound for a staging area up North to help embattled comrades stem a tidal wave of Chinese and North Korean Reds.

## British Pianist to Appear in Canyon on February 1

The distinguished British pianist, Marion Keighley Snowden will appear in Canyon Thursday evening, February 1, at 8:00 p. m. in the Branding Iron Theatre on the West Texas Campus. She will present a series of the dances mentioned in Shakespeare's plays, using slides to show how the dances were done, and playing the numbers on the virginal, a small instrument which preceded the piano, and on which Queen Elizabeth of England used to perform. Miss Snowden appears in costume, wearing a replica of one of the most gorgeous gowns of Mary, daughter of King Henry the VIII of England.

Miss Snowden was a professor in the Tobias Matthay School, London, for many years, and a colleague of Myra Hess there. She is a superb pianist, a person of great charm and culture and wit, and having her in Canyon will be a rare opportunity. The London Daily Mail speaks of her "infinite imagination." The London Daily Telegraph says she has "humour as well as poetry in the interpretation . . . unerring sense of touch and rhythm. The Tennessean in Nashville mentions "lightness of touch and remarkable speed . . . depth of feeling for each poetic mood." Professor Peter Dykema at Columbia University in New York says: "Her musicianship, her knowledge of the place of music in the development of the English people, her delicious humour, are enough to commend this unusually capable lecturer, but in addition to this, her remarkably clear and pleasant speech serves as a model which is valuable for anyone to hear who cares to have the English language given its proper recognition."

Miss Snowden is well known in Canyon. During 1950 she conducted a Master class at West Texas College in piano and also gave a series of lectures at the Canyon public school to the piano students. Since Miss Snowden has great charm in addition to her thorough knowledge of her subject, these classes were enthusiastically received.

After the program, the audience will have an opportunity to greet Miss Snowden and to examine the instrument at close range. Tickets for the performance are on sale at H. R.'s Music and Flower Shop and are also available from members of the Canyon Music-Arts Club, under whose sponsorship the recital is to be held.

## Hospital News

Robert Bellah, surgery
Mrs. A. B. Haynes, Sr., surgery
Mrs. Noland Henson, medical

Week-end visitors in the L. E. Gum home were Rev. and Mrs. Roscoe Trastle and children of Stinnett, Mr. and Mrs. E. R. Walker and Kenneth of Beaver, Oklahoma, Mrs. R. H. Francis of Perryton., Jesse Pade of Corona, New Mexico, Mrs. T. V. Donald, Mrs. Twila Daugherty, Panette and Hubert Green.

Mr. and Mrs. Fred Williams of Detroit, Michigan, who spent the holidays in the home of his mother, Mrs. C. S. Williams, left Friday for Brisco, Texas, where they will visit Mr. Williams' sister, Mrs. David Kiker, and family before returning home.

## President Wants Money to Carry on Fair Deal

President Truman has not given up his so-called Fair Deal program.

In his budget message to Congress, Truman asked for the staggering sum of 71 billions of dollars. The estimate income will be 55 billions, or a deficit of 16 billions. The national debt would be increased to 276 billions.

The President asked for 41 billions for military services; 7½ billion for international security; 1¼ billions for atomic production; 1.4 billions for defense production; 330 million for civil defense; 354 millions for maritime activities; 100 millions for defense housing; 164 millions dispersal program.

Included in the budget are all of the new fangled proposals which Truman has been presenting to Congress, but which have been turned down.

According to Washington sources, the budget will be trimmed very drastically by Congress.

Mrs. R. C. Taylor and son Robert of Lubbock spent part of last week in the home of her mother, Mrs. Berl Mayfield.

## Rain and Snow Brings Small Moisture Here

The second moisture of the year came Saturday and Sunday, but again the amount was too small to be of great value to the winter wheat crop. A retarding action is the best that can be claimed for the light rain and snow, both of which measured .20 of an inch of moisture.

The first moisture of the year fell on January 2, which measured .22 of an inch. However these two light rains and snows compared very favorably to only .11 of an inch which fell during the first three months of 1950.

The light moisture will be of benefit to wheat, holding this crop until a great amount of moisture falls. Wheat farmers have been fearful of heavy winds which would rapidly sap the sail of its slight top moisture and do great damage to the growing crop.

Wheat farmers are making no prediction as to the possible yield of wheat until more moisture is received. The county is far under the allotment of wheat which was made by the government on account of the war.

Due to the fact that row crops have produced a larger revenue during 1950 than did the wheat crop, it is predicted that a record acreage of feed will be planted in 1951, even should there be a normal rainfall which might come to the aid of the wheat acreage which has been planted.

The crop situation for 1951 remains just about the same, but in a little more favorable condition than at this time last year.

## Grades and Reports Will Be Discussed at PTA Thursday

Thursday evening, January 18, the Canyon Chapter of the Parent-Teacher Association will meet in the Canyon High School Cafeteria at 7:45 p. m. Special music will be presented by the Canyon High School chorus.

On the program E. R. Reeves, principal of West Texas elementary School, will discuss "The Grading System in Today's Schools," and Miss Sarah Thompson will discuss the topic "Reporting To Parents." In connection with the program a portion of a tape recording of an actual parent teacher group conference which took place at W. T. Elementary School in October 1950 will be used.

## Canyon Is Part of Amarilo New Defense System

Canyon is included in the Amarillo area for defense purposes according to a plan announced Tuesday.

While there is little likelihood of Canyon being bombed, even if all-out war comes, there is great danger of bombing in Amarillo. Probably the first plant to be attacked would be the helium plant, directly north of Canyon.

Canyon citizens will be asked to give full co-operation in the defense of Amarillo when the civilian committee sets up a plan.

## Nine Resolutions Sent to President and Congressmen

The Panhandle meeting held in Amarillo Friday night adopted resolutions which were sent to the President and to Congress expressing opposition to the trends of affairs in Washington.

Ray S. Daniel of Amarillo, former citizen of Canyon, was elected chairman, and J. Evetts Haley of Canyon was elected secretary.

The resolutions were read by Haley, following which there was open discussion of all phases of the resolutions.

## Bank to Close Friday

The First National Bank of Canyon will be closed on Friday, January 19, in observance of the birthday of Robert E. Lee.

**MARRIAGE LICENSE**

John S. Boling and Barbara Dene Wilson, January 15.

Clinton E. Williams and Billie Ray Evans, January 15.

Lonnie Lee Seaman and Betty Ruth Peery, January 15.

Mrs. A. D. Prater, Glenn and Rebecca Ann, Mr. and Mrs. G. W. Prater, Larry, Mary Helen and Jimmy Lynn attended the singing in Amarillo Sunday.

Mr. and Mrs. H. R. King, Jr., spent the week-end in Lelia Lake and Clarendon. Mrs. H. R. King, Sr. of Lelia Lake returned to Canyon with them to visit a few days.

**FOR SALE: One used Westinghouse Laundramat, $75.00.**
**Thompson's.**

## EDITORIAL COMMENTS

### *Unsigned Letter Is Tossed Aside As Denomination Is Attacked*

*The Canyon News* has received another unsigned letter. The author says that he cannot afford to even sign his name. He wishes this newspaper to bear all of the responsibility of publication. The writer even suggests that the letter be sent to another newspaper for publication—still unsigned.

In the letter a bitter attack is made against a religious denomination. The writer demands that atomic bombs be dropped on the seat of this church in Europe. The writer says that he is anti-communist, but would rather take his chances under communistic rule than under the rule of this church.

*The News* has no desire to get embroiled in a religious fight between denominations and creeds. We are a COMMUNITY newspaper and not the mouthpiece of any denomination.

If the writer of this unsigned letter thinks that the world is going to the dogs because of any denomination or religion, let him stand up and fight for all he is worth, but we have no desire to pull his chestnuts out of the fire by sponsoring such a fight.

From what we have learned about communism, it is anti-church, (all churches); anti-God and anti-human. We do not believe that any denomination should feel that it is above or beyond the threat of persecution should communism control this nation.

### *Legislature Will Tackle the First Things First in Session*

The legislature is to be congratulated for having taken such speedy action in getting organized and settling down, ready for business. Naturally little business will be possible in the Senate pending the inauguration of the Governor and Lieutenant Governor, the latter being the new presiding officer of the Senate.

It will be remembered last year the House stood around for three long weeks while the Speaker made up his mind regarding committee assignments. The Speaker of the House this year announced his committees the first day of the session. This is most remarkable.

The legislature advocates one improvement which will be applauded by all Texas—pass appropriations for existing institutions and departments before other appropriations are considered. We trust that no members of the legislature will feel called upon to attempt the creation of additional colleges or departments while there is such a great demand for additional funds on the part of the federal government.

### *John L. Lewis Is Trying to Get More Pay For His Miners*

No one could expect John L. Lewis to agree with other political or labor leaders.

Patriotic citizens agree that the only way the cost of living may be kept down is for the government to impose ceilings on wages and raw materials.

John L. objects. There is a feeling that the shaggy browed mine leader is getting ready to ask for another lift for his miners, which in turn will increase the cost of coal; and eventually increase the cost of steel and all other materials, without a ceiling.

We have noted with alarm the rapidly increasing prices on printing machinery and all goods in which metals are used.

John L. will get his share for the miners just as rapidly as possible.

### *Germany Lost Two Wars But Is Still an Undefeated Nation*

Rather than cry over the unfortunate and needless loss of Korea, we have been advised to pay more attention to Germany, and watch that country as it grows in strength.

We gave away the East to Russia at Yalta. The Russians are taking advantage of our free handed disposition of Korea and China, and probably the balance of the East.

We are advised that Germany is still an unbeaten and unconquered nation which will one of these days emerge stronger than ever before. The people of Germany as a whole have brains, and such a nation will not likely be subjected quickly to the heels of a conqueror.

Never postpone until tomorrow what you can postpone until the day after tomorrow.

---

Very often reporters for *The Canyon News* hears news that they cannot print.

---

The world is now faced with the question whether freedom is to prevail or not.

---

Drive carefully on the highways, even if somebody else runs into your automobile.

---

We repeatedly marvel at the ingenuity of those who wish to borrow.

### *Truman Should Call Biggest Men of the Nation to Assist*

We are not sure that the speech of President Truman last week cleared anything up in this confused nation. The only positive results were to warn Rusisa that we would be ready for a full dress war in three or four years. We are spending vast sums of money in preparation for war, whether it comes or not.

During the past week different authorities have repeated that Russia is not ready for war and will not attack us in spite of all the display of preparations which we are making. On the other hand, these different authorities proclaim that Russia will continue needling us and cause us to spend huge sums of money by defending ourselves on the globe scale of policing which we have undertaken.

Isolationism is most certainly gaining ground. The fact that no foreign policy has been adopted and adhered to by the President is pretty good evidence that we do not know where we are going—except toward bankruptcy at a breakneck rate of speed. During the past 20 years we have lived by deficit spending, and no nation has ever been wealthy enough to stand such a strain.

It is time to stop and consider.

The President should call in the best brains in the nation and allow a small group of patriotic citizens to give him advice rather than rely upon a vast number of "yes" men with whom he is surrounded.

### *Not Quite All of Truman's Fair Deal Program Is Ditched*

We are told that the President has been advised that his so-called Fair Deal is dead. When he gave his speech on the state of the nation to Congress Truman virtually demanded the passage of his Socialized Medical Act. This is the only phase of his Fair Deal program which he mentioned in passing. It may be assumed that he will sooner or later bring up his other fantastic ideas.

Socialized medicine and all of the other social frills of England are proving to be a failure. Just why should the President continue to demand that these schemes be poked down the throats of America is yet unanswered.

Let it be remembered that before Socialism swept England that nation was pretty strong financially. Today it is living off the Marshall Plan. When American dollars stop flowing into England, there will be a rude awakening of the Labor government, which is attempting to run everything in England on the Socialistic plan.

### *General Ike Is Talking Turkey To the Nations of Europe*

General Ike is telling the people of Europe that they must get ready to defend themselves if they expect the United States to come to their aid. No doubt he is telling them in plain language so that they will understand his language.

We have been kidding Europe, doling out dollars when we should have been demanding full cooperation.

The period of getting tough has long ago passed, but maybe not too late.

When General Ike gets through with his survey of Europe he will report back to President Truman and Congress will then have a better understanding of the true situation abroad.

Unless the countries of Europe are willing to help themselves, isolation will become more firmly entrenched in the American mind.

### *Lyndon Johnson a Real Leader*

*The Canyon News* supported Coke Stevenson for U. S. Senator from Texas on the basis that he was the best prepared man for the job.

We made a political mistake. Lyndon Johnson has emerged as the strong man of the Senate. He is making a wonderful record of which all Texans should be proud. More power to him.

---

The stock market ended the year 1950 with higher prices than expected which seems to indicate that business, despite its howls, has not been wrecked.

---

The editor is not anxious for everybody to agree with what he thinks; in fact, it is to be hoped that many disagree with what he writes.

---

When a business man can find no better argument than the criticism of his competition you might as well pass on and trade somewhere else.

---

If you want business in 1951 you must go after it and we suggest that the columns of *The Canyon News* is the road to greater sales.

---

When the dollar outranks honor and integrity the loss is not felt by those who have honor and integrity.

---

Have you read any poetry lately, if not, you might look into the matter and see what you are missing.

Hope springs eternal in the hearts of those who have eternal hope.

## WHO Knows

1. What nation was admitted to the United Nations in 1950?
2. What is the difference between Bactrain and Dromedary camels?
3. How old is Rene Pleven, Premiere of France?
4. Who was President of the U. S. at the mid-point of the 19th century?
5. Name the longest river in Europe.
6. What is the estimated cost of the Civil Defense program for the next three years?
7. What is the Party line-up in the new U. S. Senate?
8. What is the Party line-up in the House of Representatives?
9. Identify: Narayan Vinayak Godse.
10. Who is the recently nominated Ambassador to Spain?

(See "The Answers" on Page 7)

## News In Canyon 25 Years Ago

**(Taken from the files of the Randall County News of January 21, 1926)**

Rev. W. U. Coughan has bought the Castro County News and is having it printed in The Canyon News plant. This makes six weekly newspapers which are printed in this plant.

Among the political announcements in this issue are: Lee Satterwhite of Panhandle for re-election as State Representative from the 123rd district; Jas. L. Wohlford, re-election as county attorney; J. J. Bauer, re-election commissioner precinct No. 3; Mrs. Ethel Woods, re-election district and county clerk; Tom Redell for district and county clerk; J. M. Fite for tax assessor.

Mrs. Jim Carr died suddenly in California.

Four indictments were returned by the grand jury in district court against Jess Walker, mayor of Plainview, on charges of transporting liquor and drunkenness in Randall county.

The Northwest Texas Conference of the Methodist Church is closing a deal for the Walter Cobb ranch on the Palo Duro as an encampment.

Directors elected by stockholders of the First State Bank were: Dr. J. M. Black, R. H. Wright, Grady Oldham, J. W. Reid, and Dr. F. M. Wilson. The first three were named president, vice president and cashier.

**NOT THE SAME**

Moore: "Did I understand that you bought this house for a song?"

Lessee: "Well, no, not exactly; what I did was to buy it on notes."

**TOO BAD**

Restaurant Owner: Doesn't it seem too bad that this little lamb had to die for us?

## Beverly Beck Named W. T. Leader

BEVERLY BECK

An artist and editor of the 1951 Le Mirage is December's student of the month. Beverly Beck, sophomore majoring in art, was chosen by the student-faculty committee from a group of students nominated by the student body for last month's SOM.

Beverly's major interest right now is the annual and attempting to get pictures and copy in to meet deadlines. The first deadline has just been sent in to the engravers and copy should be sent to the printer sometime next week.

Making appointments for taking gray hairs, but somehow she seems of pictures and getting them print- to get them all done with her hair ed is something that could add a few remaining its reddish-brown color.

"All material for the annual that can be sent in must be in by February 15 if we are to get good cuts. Material used in making cuts is becoming hard to get, and we want the best pictures possible for our annual," said Beverly.

Along with all the headaches and worries of putting out an annual, Beverly has time to be secretary of the Sophomore class, a member of Alpha Rho Tau and president of Mary E. Hudspeth. And from the last organization you can gather that she must be something of a whiz to do all the others and yet have good enough grades to be a member of Mary E. Hudspeth. Plus all this she manages to turn out a large amount of art work.

Drawings, paintings and pieces of ceramics done by Beverly have been displayed in the second floor hall, in the museum and by those who have been given them. One of her most outstanding works, a black man's head, is being made from the mold by many other people dabbling in art who think it is a good piece of work. Several of these heads have been turned out and given as gifts to people on the campus. They have a smooth, black glaze and each has an expression of hauty disdain, and is named Arrogance.

Another phase of art work which Beverly has just embarked upon is oils. She hasn't finished any pieces yet, but has sketched and started the painting.

Beverly plans to go into the commercial art field when she graduates. Her experience with the annual and the art classes she is taking now should provide a good background. The students of West Texas will get an example of what she can do when the Le Mirage comes out next spring. The ideas are individual, and the Le Mirage of 1951 should be outstanding in the history of West Texas.

---

A new "Marshall plan" conceived by George C. Marshall, Defense Secretary, and designed for U. S. this time, not Europe, is to aim at gearing a big military establishment into the U. S. economy on a permanent basis. General Marshall sees years of tension ahead, short of full-scale war. His plan calls for U. S. to be strong at all times and not to rush first to all-out mobilization and then to all-out demobilization, depending on how people feel.

---

Gen. Dwight Eisenhower, newly in office as Supreme Commander in Europe, will reject the proposal of Herbert Hoover that U. S. base its defense line on Britain and Spain and not between the Rhine and Elbe rivers inside Europe. General Eisenhower is to ask for more U. S. divisions to help man defenses of Europe.

---

Harold E. Stassen, President, University of Pennsylvania: "Immediate all-out-war against Communist China would be the beginning of World War III."

---

Thomas E. Dewey, Governor of New York: "I am the best witness in the United States of the danger of thinking anything is settled before the votes are counted."

---

There is no use for us to be afraid of what the Russians might do to this country; let the Russians worry about what we might do to them.

---

She warned him to stop acting like a fool . . . and he said he wasn't acting.

STARTLING GADGET

## Mechanical Heart Made

CLEVELAND, O.—Dr. Charles B. Bailey, renowned heart surgeon of Hahnemann Medical College, announced a new mechanical heart, which could open a new era in chest and lung surgery and may even bring humans back from the dead, is ready for trial on human beings.

It has worked successfully on dogs, keeping one dog alive for 71 minutes while the spare heart circulated its blood. The dog's heart took over its usual job again when the machine was disconnected. The dog recovered completely.

The machine has been kept ready in an operating room at Hahnemann waiting for the first need of it. Its first use probably will be to try to revive a person whose heart has stopped beating.

**Amazingly Compact**

The machine is amazingly compact and substitutes for both the heart and lungs. Through plastic tubes, it draws dark-red, waste-laden blood from the veins. A steel lung gives the blood oxygen. A special pump, not bigger than the human heart, pulses refreshed, bright-red blood back into an artery.

The mechanical heart must be proved safe for humans before any doctor could risk using it on a living patient. Dr. Bailey plans to try it first only as a last desperate measure on someone whose heart stops during surgery, or from other causes.

Then if all other means fail, the surgeons will hook the patient to the spare heart, and try to bring him back to life. The other means are massaging the heart by hand, and use of drugs.

Time will be the important factor whenever the machine is used. Within three minutes after death irreparable damage is caused from stoppage of blood circulation. The brain tissues are most quickly damaged.

**New Type Operations**

Medical authorities have reported rare cases when persons "dead to all intents and purposes" have been revived, with no brain damage, after the heart had been halted for as long as eight minutes.

Dr. Bailey said one of the most important values of the new machine if successful would be in permitting many new types of heart operations. He reported such a machine could make possible safer, better operations for blue-baby conditions, better repair of faulty heart valves or other defects inside the heart, operations to keep a person alive while a blood clot was removed.

The machine could also permit the transplanting of new pieces of arteries in place of faulty or old arteries. The human heart would stay alive, still nourished by blood from tiny capillaries, still beating, but with no blood to pump or work to do.

It could be invaluable in treating such medical heart conditions as angina pecoris and coronary arteries, and such lung conditions as asthma and pneumonia.

---

### Britain Launches Inquiry Into Falling Blocks of Ice

LONDON, Eng.—The air ministry has taken over the investigation of the bombardment of England by flying blocks of ice.

Reports of strange ice falls from the sky have been reported in the southern part of England for some time. In Doven, dozens of chunks whizzed down into a flock of sheep, killing an ewe. A piece weighing five pounds crashed through the roof of a London garage.

One man said he saw a block 12 inches long and four inches thick plummet from the clouds as he was riding his motorcycle near Braughing. It landed, unbroken, in a plot of grass only three feet from him. Tumore said a motorist rode away with the block.

About the same time, a one pound brick of an odd transparent material bounced in front of the home of R. M. Butcher in the Essex village of Stebbing.

Butcher said it was neither ice nor glass.

The air ministry said the block which went through the garage roof and the one which landed on Butcher's lawn had been turned in and would be examined. The experts will analyze the blocks to determine whether they contain chemicals—such as airplane de-icing fluids—which give a hint of their origin.

---

### Walko's New Daughter Born In Snowdrift During Storm

ELYRIA, O.—Frank and Cordelia Walko have a new daughter—born in a snowdrift.

The couple left their farm home seven miles from Elyria in their automobile for the hospital. The car bogged down in the snow a mile from home.

Along came a neighbor who put the couple in his car. But it bogged down, too, four miles from the Walko home.

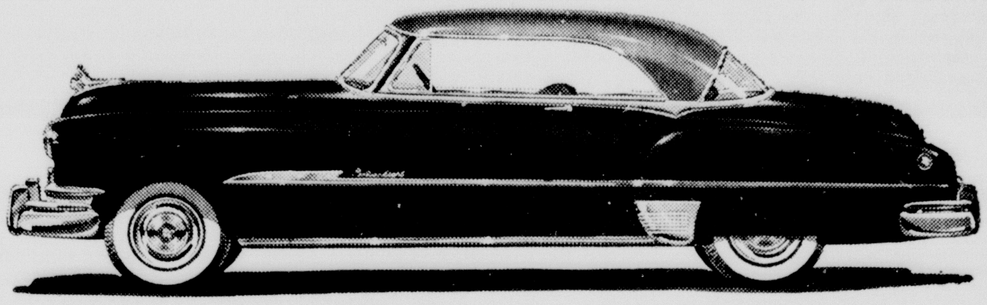

The father and neighbor then started to carry the expectant mother to a near-by farmhouse. The men stumbled when they were nearly at the doorstep of the house and Mrs. Walko fell into a snowdrift. It was there that a seven-pound girl was born.

### MOTHER-IN-LAW CLUB MEETS ON THURSDAY, JANUARY 11

The Mother-in-Law Club met in the home of Mrs. G. B. Bourland on Thursday, January 11. Co-hostesses were Mrs. Mae Johnson, Mrs. John Hilgenfeld, and Mrs. E. C. Hawes.

The president conducted the business session.

For the program Mrs. W. T. Davis gave a devotional and read the poem "Give Your Sunshine to the Living." Mrs. R. T. Bowman led the group in prayer. Mrs. E. C. Penick gave the reading "The Life of a Grandmaw." To conclude the program Mrs. Bowman told about her recent trip to the West Coast.

Refreshments were served to guests Mrs. Oma Sigman and Mrs. W. H. Lewis and to members Mesdames K. E. Frieze, G. B. Combs, J. W. Bourn, I. M. Steen, C. W. Dunn, Addie Hefner, W. T. Davis, R. T. Bowman, E. C. Penick, P. L. Pitt, W. L. Rice, Rae M. Walters, Charles Stratton, Cynthia Anderson, R. M. Gibbs and the hostesses.

The next meeting will be on February 8 with Mrs. J. W. Bourn.

### HOSTESS TO CENTRAL H. D. CLUB IS MRS. MAE JOHNSON

Mrs. Mae Johnson was hostess to the Central Home Demonstration Club on Friday, January 12. Mrs. W. L. Rice, president, called the meeting to order and presented the new president, Mrs. George Barker, who conducted the meeting.

Committees for the year were appointed. Mrs. Otto White gave the council report. The program was an exchange of ideas from and comments on magazines and articles read.

Refreshments were served to members Mesdames Rae M. Walters, Frank Phillips, S. L. Terry, K. E. Hines, George Barker, Otto White, W. L. Rice, Levi Cole, Win Matsler, P. L. Pitt, R. E. Foster, and the hostess.

The next meeting will be with Mrs. Otto White on January 26.

### MRS. CARTRITE ENTERTAINS TEL SUNDAY SCHOOL CLASS

Mrs. J. T. Cartrite entertained the TEL Sunday School Class in her home on Monday, January 15. Roll call was answered with the name of a favorite woman of the Bible. The meeting opened with the singing of the class song, "My Faith Looks Up To Thee." Mrs. G. B. Heath brought the devotional. After a short business session conducted by the class president, Mrs. W. T. Davis, Mrs. J. I. Payton introduced the program. Mrs. Mae Johnson read a recent letter from a doctor missionary, Dr. Roberta Cox of Nigeria, West Africa. Mrs. W. H. Harden presented a sketch of Women of the Bible.

Refreshments of spiced tea, banana nut cake and nuts were served to 16 members and the honor guest, Mrs. W. H. Harden.

### MISS JUNE WIMBERLY IS HOSTESS TO MUSIC ARTS

On Monday evening, January 15, members of the Music Arts Club met in the home of Miss June Wimberly with Miss Wimberly as hostess. After the business discussion, a program on Russian literature, art, and music was presented by Miss Matilda Gaume, Mrs. Joseph Findley, and Mrs. H. R. Fulton, Jr.

Miss Gaume played two piano solos, "Grasshoppers' Parade" and "Tarantella" from Children's Music by Sergei Prokofiev, Russian composer. Recording of music by Prokofiev were played.

Refreshments were served to Miss Pauline Brigham, Mrs. Glenn Dowlen, Mrs. Herman Demus, Mrs. Joseph Findley, Mrs. Fulton, Miss Gaume, Mrs. Ples Harper, Miss Isabel Robinson, Mrs. Dan Sanders, Miss Ada V. Clark, Mrs. L. F. Sheffy, Miss Margaret Barrett, and the hostess.

### NEW OFFICERS BEGIN YEAR IN SUNNY HILL H. D. CLUB

The Sunny Hill Home Demonstration Club met in the home of Mrs. Mary Williams on January 11. During the business session, dates and places for meetings for the next six months were filled in. The new officers assumed their responsibilities; the club is planning on a big year.

Refreshments were served to Myra Nell Culp, Leona Henry, Gladys Knox, Mary Jane Miller, Dorothy Evans, Mrs. J. B. Knox, Mrs. Stucks, Eula Hayes, Gene Robinson, Rosie Miller, Sue Miller, Mattie Prutsman, Maurine Allison, a visitor, Fay Bosley from Canyon, Tommy Evans, Jerry Stucks, Jimmy Allison and the hostess.

The next meeting will be with Mary Jane Miller on January 25, when Miss Patterson will meet with the club.

### HI LO BRIDGE CLUB MEETS WITH MRS. BORDEN PRICE

The Hi-Lo Bridge Club met with Mrs. Borden Price recently. A dessert course was served following the afternoon of bridge. High prize was won by Mrs. Elmer Wooten, deuce prize by Mrs. Bill Sternenberg, and low prize by Mrs. Louis Hinders.

Guests for the afternoon were Mrs. Elmer Wooten, Mrs. Hugh Greiner, and Mrs. Eddie Conner. Members present were Mesdames Murphy White, Bernard Warren, Clarence E. Thompson, Bill Sternenberg, LeRoy Moreland, Tommie Lair, Fred Jennings, Clark Jarnagin, Harold Erwin, Louis Hinders, Oscar Hinger, Aubrey Crossland, Stuart Condron and the hostess.

**FOR SALE: One used Westinghouse Laundramat, $75.00. Thompson's.**

Build, Buy, Live in Canyon!

### PENNY COX HOME IS SCENE OF EDGETOWN H. D. CLUB

The Edgetown Home Demonstration Club met with Mrs. Penny Cox on January 12. In the absence of Mrs. W. I. Wester, president, Mrs. Dallas Milner, vice-president, conducted the business session. Miss Lou Ella Patterson gave a talk on the use and alterations of dress patterns.

Refreshments of chicken sandwiches, pie with whipped cream, mints, coffee and tea were served to the following members: Mesdames Dallas Milner, W. T. Davis, J. I. Payton, J. C. Dowd, Cynthia Anderson, J. H. Wright, E. C. Penick, C. H. Stratton, Ralph Forester, Jeannette Robbins, G. B. Combs, T. T. Fain, Miss Patterson and the hostess.

### EPISCOPAL GUILD MEETS WITH MRS. FRANK KIMBROUGH

The All Saints Episcopal Guild met on January 9 with Mrs. Frank Kimbrough. Jane Darland gave the devotional and was leader in the group discussion on the topic "Consider the Bible." Mrs. Kimbrough new president, was in charge of the meeting.

Pie and coffee were served to Mrs. C. L. Joyner, Mrs. W. E. Parker, Miss Jane Darland, Miss Joann Cooley, Mrs. Fred Jennings, Mrs. George Hand, Mrs. V. K. McCaskill, and the hostess.

### TROOP 9, GIRL SCOUTS, MEET WITH MRS. E. P. HARDING

Troop 9 of the Girl Scouts met in the home of Mrs. E. P. Harding on Thursday, January 11, to pop corn. The girls decided to do leather work. Belts were chosen as the first project.

Members present were Judy Newman, Martha Harding, Jeanne Chambers, Jacklyn Barnard, Frances Boyd, Mary Sue Bolton, and Mrs. A. L. Chambers, chairman of the troop.

### RUTH CIRCLE OF WSCS MEETS WITH MRS. C. W. WARWICK

Tuesday morning Mrs. C. W. Warwick was hostess to the Ruth Circle of the Woman's Society of Christian Service. Another lesson on the current study, "Christian Vocation," was presented.

Coffee and cookies were served to visitors Mrs. J. S. Murphy, Mrs. O. W. Parker, Jr., Mrs. Bessie Parker, Mrs. H. E. Campfield, Mrs. Bertha Rhoades, and Mrs. Gladdis Samples. Members present were Mesdames E. C. Penick, C. A. Murray, J. C. Curb, T. S. Stevenson, Jr., K. C. Hines, H. L. Thurston, Wilford Taylor, Jr., M. L. Sherrod, Kenneth Goodman and the hostess.

The next meeting will be on Tuesday, February 20, with Mrs. C. A. Murray.

It seems that dolls that cry "mama" when you squeeze them have gone out of style.

### DR. BARLOW IS SPEAKER FOR WOMEN'S BOOK CLUB

The Woman's Book Club met in the Club Room of the Museum on Wednesday, January 10. Dr. Ima Barlow, guest speaker, gave "Observations of Social and Political Problems in Europe."

Guests for the afternoon were members of the Sue Hite Club. Attending the meeting were Mesdames C. A. Murray, J. Evetts Haley, Frank Barnhill, Frank Kimbrough, Loyd Devin, Frank Begert, Lee Foster, Clyde Warwick, Chas. Harter, Fred Standley, A. B. Holt, Tom C. Gooch, Walter Graham, Ben Loudder, Irving SoRelle, H. A. Brown, A. H. Prichard, Boone McClure, Herschel Coffee, L. A. Donnell, A. A. Clark, Frank Morgan, T. B. McCarter, James P. Cornette, Nancy McCaslin, Wesley Kleinschmidt, Ray Campbell, Joseph Findley, Roy L. Johnson, Lon Fannin, Miss Darthula Walker, and Miss Mae Simmons.

Mr. and Mrs. A. W. Harding and son attended the 50th anniversary of Mr. Harding's parents, Mr. and Mrs. A. A. Harding, in Bowie last Saturday. Mr. and Mrs. Harding accompanied their son and family on the return trip to Canyon and will spend a few weeks here.

Mr. and Mrs. Alex Hale of Groom spent last Saturday in the parental R. D. Lowry home. Mrs. Hale will be remembered as Hazel Lowry.

Mr. and Mrs. J. W. Bourn and Mr. and Mrs. Baxter Lambert visited Mr. and Mrs. Metz LaFollett in Seminole over the week-end.

Mr. and Mrs. A. M. Cunningham visited friends in Seminole over the week-end. Mrs. McKinney accompanied them to Seagraves.

Mrs. Mattie Davis of Friona visited her aunt Mrs. G. B. Bourland Saturday. Mrs. Davis is a teacher in the Friona schools.

Mrs. Wilford Taylor, Sr. returned last Sunday from Burbank, Calif., where she visited her sister, Mrs. John S. Evans.

A. D. Prater, employed with the Plains Plumbing Company of Amarillo, is working in Santa Fe, New Mexico.

Marshall Konstantin K. Rokossovsky is being put forward by Russia as her counterpart of General Eisenhower. Rokossovsky, Soviet boss of Poland, is being given over all direction of Russia's satellite forces in Europe, including those of East Germany.

Chiang Kai-shek, leader of Chinese Nationalists, never has asked U. S. for the right to start an invasion of China's mainland from the island of Formosa and is not prevented by the U. S. Seventh Fleet.

## Not a Very Healthy Sign

Klement Gottwald, Communist President of Czechsolovakia, has some reason to wonder about his future. President Gottwald is resisting Russia's demand that Czechs work harder, produce more, but reduce their own living standards still further in order to ship more goods to Russia. Russia has a habit of getting her way even if it's necessary to liquidate local rulers.

George Marshall, Defense Secretary, still hopes to be able to retire at some point in 1951. General Marshall wants to make sure, however, that his successor will be someone without political ambitions. He would like to see Mr. Truman select John J. McCloy, present U. S. High Commissioner in Germany, or another of that calibre for the job.

Dean Acheson, U. S. Secretary of State, has told the British bluntly that U. S. will not reward Communist China with new honors, territory, or anything else as a price for restoring peace in Korea. Patience of high U. S. officials is wearing thin with allies who are trying to force U. S. into doing business with a Communist regime waging war against American troops.

A strong "isolationist" or "Britain first" urge is credited by important American officials with inspiring Britain's eagerness to do business with China's Communists at almost any price. The fear is that there won't be quite so many dollars for Europe if U. S. stands up to Communist forces in the Far East.

Gen. Dwight D. Eisenhower, Supreme Commander in Europe, if interested, will discover that some Senators who favored his choice as Republican nominee for the Presidency now have shifted to the side of Senator Robert Taft. The Taft band wagon is rolling along at a fast clip in Congress.

Sam Rayburn, Speaker of the House, is the one who had most to do with convincing President Truman that he should sidetrack his "Fair Deal" for the time being. Speaker Rayburn wants the President to try to win Congress with kind words and cautious proposals.

### NOTICE OF GUARDIAN'S APPLICATION TO MAKE OIL, GAS LEASE

NO. 707

GUARDIANSHIP OF MAURINE SCRUGGS, MINOR.
IN THE COUNTY COURT OF RANDALL COUNTY, TEXAS.
TO ALL PERSONS INTERESTED IN THE ABOVE MINOR OR HER ESTATE:

You are notified that I have on the 16 day of January, 1951, filed with the county clerk of Randall County, Texas, an application under oath for authority to make an oil and gas lease on that certain real estate belonging to such minor, namely, Maurine Scruggs, described as follows:

A part of the Thomas Scott Survey, Abst. 661, and more particularly described as beginning at the N. E. Corner of the C. Goolsby 80 acre tract, said point being 516¼ vrs. north of S. E. corner of said Scott Survey; thence west with north boundary line of said Goolsby tract 875 vrs. to said Goolsby's N. W. corner in the east boundary line of 268.9 acres of said Scott Survey in the name of S. D. Howard; thence north with east boundary line of said Howard tract 516¼ vrs. to corner, being the S. W. corner of G. W. Ayers 109.9 acre tract in said Scott Survey; thence east with the south boundary line of Ayers tract 875 vrs. to his S. E. corner in the east boundary line of said Scott Survey; thence south 516¼ vrs. to the place of beginning, and containing 80 acres, more or less, being same land described in deed dated October 8, 1945 from Stella Goolsby and husband, Claude, to Herman E. York, recorded in Vol. 272, page 304, Deed Records of Montague County, Texas, and that the minor owns fee simple title in an undivided one-eighth of an undivided one-sixth in the above eighty acres; that Burney Slack, judge of the county court of Randall County, Texas, on the 16 day of January, 1951, duly entered his order designating the 29 day of January, 1951, at 10 o'clock a. m. in the county courtroom in the courthouse of such county as the time and place when and where such application would be heard and that such application will be heard at such time and place.

W. T. SCRUGGS,
Guardian of the estate of
Maurine Scruggs, minor.

Witness my hand and official seal, at Canyon, Texas, this the 16 day of January, 1951.

(Seal)
T. H. LAIR,
Clerk of County Court,
Randall County, Texas.
By: Margrethe Taylor,
Deputy. 46t1

# Russians Claim Discovery May Be Key to Life

NEW YORK—Russian scientists now claim a discovery which they say may even help science create life from nonliving matter.

The purported discovery is in how living cells—of plants or animals—are formed. It has been given official Soviet blessing.

However, Robert C. Cook, editor of the Journal of Heredity, published by the American genetic association, says the theory is "complete nonsense and a "part of a gallop back into the middle ages or before" by Soviet party line science.

**Russians Add Link**

The Russians say, yes, this happens, but that they have found something new in addition. The new thing, they claim, is that some living cells come from tiny living particles which are not cells. The cells generated by these particles are different from ordinary cells and form a vital part of the new plant or animal.

These particles may be "a connecting link" between living and nonliving matter, claim articles in Soviet newspapers.

Soviet biology is approaching the solution of the great problem of the processes of qualitative changes in nature and the transformation of nonliving matter in living. This problem can be solved by the Marxist-Leninist philosophy and used the methods of materialists dialectics, the articles declare.

**Credited to Woman**

The theory also offers support to Soviet claims that wheat has been changed into rye by grafting plants together. The strange particles supposedly figure in bringing this about.

Prof O. B. Lepeshinskaya is credited with the discovery. The Articles say Prof Lepeshinskaya has found "proof" that the tiny mysterious particles can become cells, under the right conditions. She is said to have photographed tiny grains of white matter in the yolk of birds' eggs, tracing their development into cells.

Prof. Lepeshinskaya first published her findings in 1945. But in 1948 leading Soviet scientists, who believed in cell division, tried to suppress her views, the article said.

The articles do not say what happened to these men, but says they "held" leading posts at the time, and "were" the leaders of the Histologists' scientific society.

The articles bitterly attacked "American imperialism" and one hailed Stalin as the "great coryphaeus (chorus leader) of science."

## 'Never Say Die,' Is Motto Of Dog 'Dead' and Buried

CHICAGO, Ill.—Brownie, a five month old dog, strayed into the home of Albert Herman in suburban Calumet City and was adopted by Herman's four young children.

Then one day the dog was hit by an automobile and seriously injured. Mrs. Herman rushed him to a veterinarian but he was out of his office. She decided to put the dog out of its misery.

A neighbor took Brownie to a wooded area and fired one shot at the animal's head. Then he placed the dog in a shallow grave and covered the body with sand.

The next day, Mrs. Herman said, Brownie showed up at her back door—whining. She again rushed him to a veterinarian who soon had him patched up.

Splints were removed from the dog's fractured left hind leg recently. He's frisky and playful—with only a slight limp. The vet said that the bullet fired by the neighbor had ricocheted off Brownie's skull without inflicting serious injury.

## Unknown Soldier of Last War Could Be a Woman

WASHINGTON. — Could the unknown American who will symbolize the American dead of World War II be a woman?

Legally, in the Army's opinion, it is possible. The law provides that the person to be enshrined in Arlington national cemetery beside the Unknown Soldier of World War I shall be an unidentified American who lost "his" life in the armed services overseas. But the Army thinks congress did not intend this use of "his" to bar a woman from being honored.

Actually, there seems to be less than a chance in a million that the unknown dead of World War II will be a woman. The army says it knows of no woman buried among the unidentified dead of that war in U. S. military and national cemeteries overseas. It is from those unknown dead that the unknown American will be chosen.

Should the remains of an unidentified woman member of the armed forces who lost her life during the war be found overseas buried in one of the cemeteries between now and next fall, her code number would be included in the drawing that will start the selection process on or before October 1.

And should the woman's code number be drawn, her body might be among the six to be moved to Philadelphia for the final selection May 26, 1951

ACTH, cortisone not specific against cancer; experts report.

## Nuts!!

**Just English Confusion**

ROGATE, England—The English who have laughed for years at Americans for "butchering the King's English", have at last got themselves involved in grammar.

In Britain, unground groundnuts are peanuts and ground groundnuts are peanut butter. This is a simple fact. But not to the government.

C. F. H. Cough, a Conservative, quoted the following extract from a government order in a political speech:

"In the nuts (unground) (other than groundnuts) order, the expression "nuts" shall have reference to such nuts, other than groundnuts, as would, but for this amending order, not qualify as nuts (unground) (other than groundnuts) by reason of their not being nuts (unground)."

Why don't they say peanuts and be done with it?

## Germans Who Fled Russians Say They Are Ready to Fight

BERLIN, Germany—Thousands of Germans have fled the Russian occupied zone in the last year and every one of them would fight the Soviet if necessary.

Willie Reusch is an example. He was a pupil in Rostock in the Russian zone. When he finished high school—he was 20 having been delayed three years by the war—The Russians assigned him to a unit of the people's police.

Will was sent to barracks, given a uniform, and was to begin military training the next day. Instead, he escaped and made his way southwest to the British zone.

Many refugees come from the districts of Leipzig and Dresden in Berlin. But few come from the Baltic region. Willie's story was therefore unusual.

He will be given papers and concealed identity so he can be enrolled in a Hamburg university.

An emaciated, tall, blue-eyed fellow whose bony arms protruded from his tight fitting coat, he is intelligent and well informed. Willie has no illusions about the strength of the Russians and their activity.

In the region of the Baltic, he said, the Russians were "in very strong force, prepared for instantaneous battle. They could count on half the German population throwing in with them. At least 45 per cent of the people are Communist," he said. "The Russians have been there for over five years, and they began immediately working on the youths between 5 and 15. They have never let up."

He said there were 82 factories in the Russian zone working at top speed on weapons for the Russians and the people's police.

"Besides machine guns and small arms," he said, "they manufacture mobile units, heavy cannon, and the huge Stalin type tanks." While no airplanes are manufactured in the east zone, their parts are produced and shipped to Russia.

## Steel Squeezed Like Paste To Produce Large Shells

PITTSBURGH, Pa.—A new process of making artillery shells has been reported by the steel industry. Shells now are being squeezed into shape somewhat as tooth paste is squirted out of a tube.

The new method is called cold extrusion and saves a great amount of steel. By using powerful hydraulic presses, steel men now take a "slug" of steel five inches in width and height and squeeze it into a shell casing about 15½ inches long.

Until the process was perfected recently, the shells were made by hot forging. In forging, the metal is shaped by heating and hammering. Hot forging of shells requires about 40 per cent more metal.

Cold extrusion has these additional advantages:

(1)The cold extruded product needs practically no machining.

(2) Little or no alloy is needed because good mechanical qualities are obtained by cold working the steel.

(3)The glassy, smooth surface of the finished shell is a natural result of the cold extrusion process. No other operations are needed to acquire the finish.

Iron Age magazine, in discussion of cold extrusion of 105 millimeter shells, says the Mullins Manufacturing Corp. at Warren, Ohio, now is cold extruding "shells of better quality at less cost and with less material than they could by hot forging."

## Weary Husband Socks Wife After Long Shopping Trip

GREEN BAY, Wis.—Spectators in municipal court in Green Bay were very understanding when Selmen Stutleen explained how he happened to swat his wife in the eye.

Stutleen explained that his wife had taken him on a shopping trip for a certain item, which couldn't be found. Finally his wife insisted that she had seen it at a particular store, and off they went again, Stutleen said. At the store a clerk told them the item never had been carried.

Outside the store, a quarrel commenced. That, Stutleen said, was when his wife got hit in the eye.

And although there was a murmur of understanding from the spectators, he was fined $10 for assault and battery.

Yale receives anonymous gift of $1,000,000 for research.

## Highland News

We had a snow to fall Saturday night. Not much wind accompanied it so it fell smoothly adding more moisture to the ground.

Farm Bureau met on Friday evening at the Highland School house. The crowd wasn't so large due to cold weather, but "42" was enjoyed by all present.

Grandma Grabbe continues to improve. She was to try to walk Saturday. She broke her hip by falling in her home over a month ago. She is in St. Anthony's Hospital in Amarillo.

W. H. Hardin of Canyon held the prayer services at the Palo Duro Baptist Church on Wednesday evening.

Mrs. Crouch visited Mrs. Sam McCraw Friday afternoon.

Mrs. Earl Cox and Ricky will be home Tuesday. They have been visiting Mr. Cox's parents in Tulia.

Mrs. Roy Lee Jones attended the funeral of her aunt in Amarillo on Friday.

The Highland Club met in the home of Mrs. Winston Evans on Monday evening.

## Wright and Cross Stand at Head of Nation's Football Great in Season

**Bill Cross, left, and Charlie Wright, the famed "Wright-Cross" football offensive punch of West Texas State are the new national rushing champs. In Ten games this year they shattered the fabulous Glenn Davis-Doc Blanchard (Army) mark by 738 yards. Cross, the fullback, gained 1,187 yards and Wright, the halfback, 1,203. Cross led the nation's ball-carriers in yards gained per carry with a 9.2 average. Both were named unanimously to the All-Border Conference team this year.**

SAFECRACKER'S JOB

## Safe Closed Until 1976

WASHINGTON, D. C.—A safe-cracking ceremony is scheduled in the nation's capital in 1976.

When the nation became 100 years old in 1876 Mrs. C. F. Deihm of New York city determined to do something that would mark the passage of the United States into a new century.

Out of her determination came installation of a "centennial safe" in Memorial hall at the Philadelphia exposition in 1876.

Mrs. Deihm set out to get the signatures of famous people of the time and other material to put in the safe. She dispatched leaves of the "centennial album" throughout the country and gained concessions from express companies to transport them free of charge. She even obtained credentials from the cheif justice of the United States and others high in authority.

**Roundsup Autographs**

The year 1876 ended, however, with a number of signatures short. So the scheduled closing of the iron doors was postponed. Mrs. Diehm traveled about, giving notices to papers that she was on hand with the album.

More than two years passed before Mrs. Diehm felt that the time for the final roundup of signatures had arrived. When she arrived in Washington, however, to place the safe in the rotunda of the capitol, the authorities would not allow it to be placed there. A compromise was reached and the safe was set in a corner of Statuary hall. There it remains to this day.

The newspaper stories of the day reported:

"The safe is designed to contain memorial articles, and will not be unlocked for a century.

"The safe has inner doors of plate glass. Among the contents are handsomely bound albums, to contain photographs and autographs of leading centennial officers, and those of governors and other prominent men.

**Key Is Lost**

"There are also autograph books, a silver inkstand lined with gold, and two gold pens, one of which has been presented by Henry W. Longfellow. One album is larger than the others, and whoever records his name therein is entitled to the space below his name, so that when the books are opened in 1976 the direct discendant of the signer may record his own name too. There is also in the safe an album to receive the photographs of foreign ministers and visitors."

Today the safe is a battered relic. Pictures and inscriptions on its surface have vanished. One of the two handles is broken and effort is required to turn the dials controling tumblers that have not moved for decades. But it makes no difference for nobody nowadays has the combination.

The key used to lock the inner doors on that faraway noon in 1879 has vanished.

It will require a safe-cracker to open the safe which was the dream of a stubborn and determined woman.

### Two New Drugs Are Used In Korea for Frostbite

KOREA—Two new drugs are being used by United States army doctors to fight frostbite suffered by American soldiers in frigid Korea.

Army officials said the drugs are priscol, administered in tablet from, and tetraethyl ammonium chloride, which is injected. Both were developed after World War II.

Col. Francis W. Pruitt, Shelbyville, Ind., consultant on internal medicine in the army's far east command, said it was too early to determine the final effectiveness of the drugs, "but we do know that they have been very successful in giving relief."

Frostbite damages nerves and tissues, causing intense pain and spasm. The new drugs, Pruitt said, tend to repair the damage and control the spasm.

Col. A. L. Gorby, Palo Alto, Cal., surgeon of the U. S. 10th corps, estimated that half of the American soldiers who are frostbitten are returned to duty.

### Operation on Boy Performed In Darkness Saves His Life

DETROIT, Mich. — Gerald Kilbourne, 14, was accidentally shot in the forehead with a .22 caliber rifle. He was knocked out and when he came to, he noticed a small gash on his forehead. He thought it had been caused by striking himself with his rifle while he was bending over.

A week later he complained of a headache. An X-ray showed the bullet had lodged back of the sinus.

There followed an unusual operation performed in darkness by X-ray which saved his life.

As one doctor performed the operation another physician directed it by watching the bullet and movement of the instruments on the fluoroscope screen of an X-ray.

The surgeons had to work in darkness because the only way to find the bullet, without overwhelming risk, was to use X-rays shining on the fluoroscopic screen. The operation was performed through the roof of the mouth.

Rubber supply conditions to be spent in 1951 for expansion.

## BOYCE HOUSE "Gives You Texas"

Early days in Texas are described by Mike Campbell of Lockney, well-known newspaperman:

"My maternal grandparents settled at Dresden, Navarro County, in 1844, on land granted them by the Republic of Texas. Our family still has that old document with Anson Jones' signature. The settlers made annual trips to Houston in wagons drawn by oxen for supplies, usually taking two months to make the round trip. There was not a fence between Dresden and Houston, except rail and brush fences around small fields and corrals.

"In those days, wild horses, cattle and wolves roved over the prairies. Prairie chicken were plentiful.

"My grandfather owned a slave who made all the shoes and boots. Cowhides were of the utmost use in the early days. They furnished shoes, harness, bull whips, chair bottoms and hinges for doors; and sometimes vessels for carrying water were made of leather.

"The Meltons were also early settlers in that section. Ethan Melton married my grandmother's sister. My great uncle, John Welch, told me of the Battle of San Jacinto, and the capture of Santa Anna. He related: 'Deaf Smith and I had been looking after some pack mules, and as we walked up to where General Houston lay, some of the boys led up a Mexican, dressed in the uniform of a private, facing the general. The Mexican made a sign with his hand and General Houston answered with his hand. About that time, some other Mexican prisoners exclaimed, "El Presidente! El Presidente!" Then we knew we had Santa Anna.'

"Now nestling in a little valley north of Old Dresden lies the Melton cemetery fringed with wild plum and persimon thickets. There sleep pioneers, including my maternal grandparents. The song of the mocking-bird may be heard in the stately elms, but no more do the mournful howl of the timber wolf and the haunting notes of the horned owl boom out in the dark hours of the night. Yes, in North America, frontiers have vanished forever."

### FOOD PRICE INDEX

During the last week in December, the food price index recorded by Dun and Bradstreet scored to its highest point since September 14, 1948—$6.90, or 20.6 per cent over the year ago index of $5.72. The record peak was $7.36 on July 13, 1948. The index represents the total wholesale cost of a pound each of 31 foods in general use, as wheat, oats, hams, bellies, butter, potatoes, cheese, beef, etc.

As Handy As Your Sock---

AND A LOT SAFER

It's just about as easy to bring your money here for deposit as it is to stuff it in "the old sock."

Besides that, it is a LOT safer to keep your money on deposit here, pay bills by check and avoid the risk of loss, of theft, of double payment of bills, or other mishap.

You don't have to have a lot of money to enjoy our friendly service. We want small accounts, along with the more generous sized ones.

# Sun Bowl Trophy Displayed at West Texas State

**This is the gigantic Sun Bowl Trophy won by the West Texas State Buffaloes at El Paso, January 1, 1951. The trophy will stay at West Texas as long as WT continues to win the Sun Bowl. It is now on display in the outer room of the President's office, and will be moved to the gym when it is completed. Trophy cases now at West Texas are much too small for the trophy.**

Thomas E. Dewey, Governor of New York: "In a world of brute force, there is freedom only for the brave."

Three-fourths of U. S. children under-nourished, study shows.

**DEFINITIONS**

A Communist has been described as a chap who borrows your pot to cook your goose.

Byrd reiterates plea for less non-military spending.

May blessings be upon the head of Codmus, or the Phoenicians, or whoever invented books.—Thomas Carlyle.

Books teach us very little of the world.—Oliver Goldsmith.

## Museum Visitors Set New Record

Attendance at the Panhandle-Plains Historical Society Museum for the year of 1950 was 70,928. The 1949 attendance was 60,517.

Every state in the union was represented in 1950.

People from foreign countries who visited the Museum in 1950 were from Puerto Rico, Canada, Arabia, Japan, Panama, Norway, India, Bolivia, England, Scotland, Nigeria, Austria, Germany, China, Denmark, Venezuela, Ecuador, Poland, British West Indies, Ireland, South Africa, Colombia, France, Belgium, Holland, Cuba, and Spain.

**E-BONDS**

Cash-ins of Series E bonds are expected to exceed purchase during 1950 for the first time since the bonds were put on sale in 1941, as part of the World War II defense drive. Treasury records showed that cash-ins reached a total of $3,384,000,000 for the 1950 period up to December 1 and were running $178,000,000 above purchases. Total purchases for 1950 were expected to fall below $4,000,000,000 for the first time since 1942.

# P-TA Holds Its Conference in Austin Recently

Austin, Texas. "Safeguarding Our Freedoms Through Responsible Citizenship" was chosen as the theme of the three-year administration of Mrs. H. G. Stinnett of Plainview, President of the Texas Congress of Parents and Teachers, at the mid-winter conference of the Board of Managers in Austin, January 8-9. The annual program will be built around this theme. Mrs. C. N. Bustin, Jr., of Austin, state vice president, was chairman of the committee to select the theme.

A project approved by the board was the joint sponsorship by the Texas Congress and the Texas Safety Association of a workshop composed of district safety chairmen, early in the summer, for the purpose of developing a guide to community action for the prevention of accidents. C. L. Yarbrough of Port Neches, state safety chairman, proposed the action.

The board also voted to continue the granting of one scholarship of $200 to in-training teachers in the teachers colleges, A. & I at Kingsville, and Prairie View A. & M. This project was started in the fall of 1949.

It was also voted that the board and the past state presidents be official delegates to the national convention in Miami, May 21-23. Other allowable delegates will be apportioned among the 16 districts. As each state is allowed one delegate for 1000 members, Texas may have well over 300, with its membership of almost 350,000.

Mrs. A. W. Lightfoot of Beaumont, state chairman of councils, was elected to fill the vacancy in region III vice presidency, the region being composed of district 4 and 9. Elected to the Board of Trustees of the Ella Caruthers Porter Memorial Endowment Fund were Mrs. A. N. Dahl, Pettus, chairman; Mrs. Warren Freund, Austin; Messrs E. D. Walker, Paul Danna and R. A. Ritchie, all of Dallas.

Dr. J. W. Edgar, State Commissioner of Education, was an honored guest at the final session where he was presented a national life membership from the board of managers. He commended the cooperation of the P. T. A. and the schools from local to state levels.

Other guests were J. O. Musick of the Texas Safety Association, C. E. Sanders of the Texas Education Agency, Dr. A. K. Brace and Dr. L. D. Haskew of the University of Texas, who will assist in the safety workshop. From the Texas Association of School Boards were W. I. Kocurek, Austin, chairman, Dr. A. L. Chapman of the University of Texas and Mrs. O. D. Weeks of Austin. Each spoke briefly on the growth, work, and responsibility of the organization and urged cooperation of parent-teacher members with their local school boards. Mrs. Stinnett is second vice president of the association and member of the Plainview board of trustees and of Wayland College.

The board voted to send Mrs. Stinnett to the national convention of school administrators in Atlantic City, February 18-24, where she will participate on the program. Prior to the meeting she will attend the conference of the National Association of School Boards. She is now en route to a regional conference on teacher education and professional standards in Jackson, Miss., January 12-13. Mrs. Stinnett reported about the various conferences at which she represented the Texas Congress—T. S. T. A. in November, Infantile Paralysis Foundation and Governor's Emergency Safety Conference in December, Texas School Administrators in January.

E. N. Dennard of Waco, state legislation chairman, reported on the national legislation conference which he attended in Chicago in December, sponsored by the National Congress of Parents and Teachers. The purpose of the meeting was to secure national unity and understanding of the Congress program of legislation. Mr. Dennard will represent the state Congress at the Texas property Defense meeting in Austin January 20.

Others reporting were Mrs. Bustin and Mrs. A. K. Japhet of San Antonio, state chairman of the exceptional child, on the social welfare conference; Mrs. J. H. Moore of Deport and Mrs. Joe A. Wessendorff of Richmond, past state presidents, and Mrs. Dahl on the Midcentury White House Conference on Children and Youth held in Washington in December. Each told of the magnitude and scope of the conference, such as 6000 representatives, 125 booths, 290 speakers, the youth conferences, the President's address, and so on. About 20 were there from Texas. A film and findings are to be made available to the public.

Tentative plans for the state convention to be held in Dallas November 14-16 were made. Plans of state chairmen and for the revision of the state handbook were approved.

A temporary past state presidents' club was organized with Mrs. Noyes Darling Smith of Austin, president; Mrs. Moore, vice president; Mrs. E. H. Becker of Conroe, secretary; Mrs. Jack M. Little of Corpus Christi and Mrs. Wessendorff to draft standing rule. There are five other living past state presidents.

Only three of the 55-member board were absent. Members of the board attending from Eighth District were: Mrs. W. D. DeGrassi, Amarillo; Mrs. Hugh Cypher, Borger; Mrs. Orville K. Smith, Childress; Mrs. Crews Henry, Canyon.

To monopolize the conversation is to monotonize it.

$25,000,000 loan from Britain to help Canadian aluminum.

## N. Y. C. AA-Gunners Blast Soviet Aircraft

Or at least that's the way it looks in this picture combining photographs of three new Russian planes with a view of New York City's recently-installed anti-aircraft battery at Fort Totton. The Russian planes, zooming over the Army's 120-millimeter guns, are: at upper left, a TU-4, the four-engine bomber closely resembling in performance and appearance America's B-29 Superfort; directly below it, an MIG-15, the jet job which has been taking a beating in Korean border fights with U. S. Shooting Stars; at left, a Lavochkin jet that is reported to be faster than Russia's Yak. Although the Red ships appear formidable, the cocky gunners guarding New York gave 100-to-1 odds that they could knock anything out of the sky with their radar-controlled weapons.

## Fairview Breezes

This vicinity was blessed with a light rain, followed by about an inch of snow Saturday night. It was fair and warm Sunday.

Gene Shipman was taken to the Neblett Hospital Saturday evening with an attack of appendicitis.

T. H. Shipman is in the Neblett Hospital.

Born to Mr. and Mrs. Gordon Foster Saturday morning in the Tulia Hospital, a son.

Nan Earlye Shipman has her leg in a cast from a dislocated bone in her knee.

J. D. Prossor is convalescing in the G. E. Wesley home.

Mrs. H. C. Evans was in Tulia Wednesday.

Work on the church is progressing nicely.

Darrell Wesley went to Levelland Wednesday to help his brother, Wayne.

Kenton Wesley was rejected at Albuquerque when he volunteered to join the navy, and returned home Saturday.

Mrs. J. W. Wesley had a Stanley party Friday afternoon with 13 women present.

Fayerene Schaeffer visited her parents over the week end.

Mr. and Mrs. Dean Cagle and Lynda visited Sunday in the J. W. Wesley home.

Those vaccinating and branding the past week were: Tom Rogers, Darrell Wesley, J. W. Wesley, G. E. Wesley, Woodrow Tucker.

The H. D. Club will meet Friday afternoon in the home of Mrs. Curley Myers.

Melton Schaeffer, son of Mr. and Mrs. Melvin Schaeffer, has been quite sick with a cold.

Mrs. E. W. Schaeffer was able to be out Friday afternoon.

Mr. and Mrs. Charles Wesley and children stayed in Happy Saturday night with Mrs. Wesley's mother.

Charles Wilson is working in Happy.

## Curb-Cupell Wedding Date Is Announced

Mr. and Mrs. Claude Curb, 3906 Polk, Amarillo, announce the engagement and approaching marriage of their daughter, Lois Jean, to Bennie Joe Cupell, son of Mr. and Mrs. B. L. Cupell, 2901 E. First, Canyon. The wedding is to take place on February 10 at Trinity Methodist Church, Amarillo.

Mrs. Lee Foster is attending the Mid-Winter Executive Meeting of the Synodical of Texas in Texarkana this week. She is Synodical Officer of Christian Education in Texas. The meeting dates are January 16-19.

## Value Your Health More Than Riches

Some folks think that fine clothes and fine, big houses are the most important things in life, but these things really don't mean too much if a person doesn't feel well enough to enjoy them. Most folks don't realize this, but Mrs. Lucy Braswell, of Route 2, Stone Mountain, Ga., realizes it very well. Mrs. Braswell takes HADACOL, and by taking HADACOL she found she is helping her system overcome deficiencies of Vitamins $B_1$, $B_2$, Niacin and Iron, which HADACOL contains.

Here is Mrs. Braswell's own statement: "I have been sick for some time with stomach disturbances. I began taking HADACOL and I have been taking it about six weeks. I am so much better and much stronger. I will continue to take HADACOL. It sure has helped me. I tell my friends about HADACOL. I can't praise HADACOL too much. I am 59 years old."

© 1950, The LeBlanc Corporation

### PLEASANTVIEW H. D. CLUB MEETS IN HOWELL HOME

On Thursday, January 11, the Pleasantview Home Demonstration Club met in the home of Mrs. J. W. Howell. Miss Lou Ella Patterson discussed and illustrated pointers to be considered in choosing a pattern.

Refreshments were served to guests Mrs. Bill Martin, Mrs. Charley Davenport, Mrs. Gene Howell, and Miss Patterson, and to members Mesdames M. B. Brown, Earl Burtz, Christler Crain, Joe Carver, A. B. Haynes, Jr., John Jennings, Henry Meyer, Tom Moore, W. T. Reynolds, Marion Keller, R. A. Hodges, E. T. Cramner, Clifford Burtz, Lee Bailey and the hostess.

### ZITA H. D. CLUB MEETS IN HOME OF MARTHA OLSON

The Zita Home Demonstration Club met in the home of Mrs. Martha Olson on January 9 with Miss Patterson giving a demonstration on choosing patterns and materials.

The chairman called the house to order and named committees for the following year.

Those attending were Mesdames Dorothy Olson, Ethel Michael, Monty Rockwell, Mary Gruner, Juanita Gruner, Geneva Fulton, Helen Truax, Ila Jennings, LaVada Rose, Donabel McCormick, Helen Ruthart, Easter Olson, Miss Patterson and the hostess.

### MR.-MRS. MILTON MORRIS ENTERTAIN DINNER CLUB

The Thursday Night Dinner Club met in the home of Mr. and Mrs. Milton Morris on January 10. The membership of the club attended—Mr. and Mrs. M. J. Newman, Mr. and Mrs. Hosea Foster, Mr. and Mrs. Larry Holman, Mr. and Mrs. J. O. Parker, Dr. and Mrs. R. P. Jarrett, Mr. and Mrs. Houston Bright, and Mr. and Mrs. Gordon Lyons of Amarillo.

High score for the ladies was won by Mrs. J. O. Parker. Larry Holman was high scorer for the men.

## Beatrice Clark, Carter Russell Marry in Calif.

Dr. and Mrs. Wallace R. Clark of Canyon announce the marriage of their daughter Beatrice to Mr. C. Carter Russell at the St. Stephens Episcopal Church in Hollywood, California, on Friday evening, December 29, 1950, at 8 o'clock. Mr. and Mrs. Russell are at home at 3316 Barham Boulevard, Hollywood.

**FOR SALE: One used Westinghouse Laundramat, $75.00.**
**Thompson's.**

John Foster Dulles, Republican adviser to the State Department: "If we had sought only to save ourselves, the tide of Communism would have rolled on irresistibly."

Robert A. Taft, U. S. Senator from Ohio: "The feeling in Washington is a kind of wavering between panic and reassurance that goes right up to the Pentagon."

## Evelyn Black Becomes Bride of J. T. Denton

On Sunday, January 6, Miss Evelyn Black of Panhandle became the bride of J. T. Denton, son of Mr. and Mrs. John A. Denton of Amarillo. Vows were exchanged in the home of Rev. G. M. Eastman, pastor of the First Christian Church in Tucumcari, New Mexico.

R. S. Denton of Amarillo served his brother as best man, and Miss Laura Ruth Glenn of Canyon was maid-of-honor.

The bride was dressed in a grey tailored suit with a white blouse and black accessories. Her corsage was of pink and white carnations.

Mrs. Denton is a graduate of Canyon High School and West Texas State College, from which she received her B. A. degree in 1948. She was a member of Delta Zeta Chi sorority. Mrs. Denton is English and art instructor in Panhandle High School and i s a member of Epsilon Sigma Alpha National Sorority of Panhandle.

With his brother R. S. Denton, Mr. Denton is co-owner of the Denton Service Station on Northeast Eighth in Amarillo. He is a student at Amarillo Center and will graduate from W. T. in June.

The couple is at home in Panhandle.

**LAUGH and RELAX see "THE JACKPOT" starring James Stewart at Olympic Thursday-Friday.**

### BIG CARRIER

The Navy has announced that it will build another large-size aircraft carrier, but not as large as the huge flush-deck carrier United States, which was abandoned in the keel-laying stage by order of former Secretary of Defense Johnson. The Navy's large carriers are 45,000-ton vessels; the United States was to have been 65,000 tons.

### NATIONAL ECONOMY

The National economy is sounder, more flexible and more vigorous than at the outbreak of the second World War, according to Secretary of the Treasury John W. Snyder. While Snyder saw no immediate need for rationing food, tires or gasoline, he warned that higher taxes are on the way, due to the heavy expenditures necessary for the defense program.

### NO DEBTS

A Federal Reserve Board survey reveals that about half of the nation's 50,000,000 "consumer spending units" owed no debts at all early this year. Sometime ago the Board reported that one-third of all families had spent more than they took in during 1949, when prices were lower than they are today.

The bravely dumb who did their deed,
And scorned to blot it with a name;
Men of plain, heroic breed,
Who loved Heaven's silence more than fame.—Lowell.

SOCIALIST PLAN

## Britons Get Free Divorce

LONDON—The Socialist government of Britain has been giving away a number of things including free medical attention. Now the British have come up with another—free divorces, and thousands of Britons are lining up to take advantage of the offer.

An uncomplicated divorce has been costing about 70 pounds ($196). It was a luxury many could not afford, and numerous marriages limped along lovelessly and bitterly because the cash to dissolve them was lacking.

The government's new legal-aid program, which provides free lawsuits for the poor and cheap ones for persons of modest incomes, has brought a flood of inquiries from Britons wanting divorces. In fact, court facilities may have to be enlarged to deal with them.

**Not Free to All**

The legal aid is not free to all persons. The government foots all the bills for individuals earning less than three pounds ($8.40) weekly who are involved in high-court actions. For those earning more, there is a sliding scale, with the state paying various proportions of the cost.

Unlike the free medical service, persons who can afford to go to law must pay their own bills, and the plan does not cover a variety of civil actions heard in county courts. Divorce is a high-court affair. Regional boards of the law society, the national professional association of attorneys, pass on applications and certify those qualifying for aid.

No one with Capital of 500 pounds ($1,400) is eligible for help in any degree under the complicated sliding-scale arrangement.

"The thought is," said the lord chancellor, "That people should not be prevented from exercising their legal rights because of lack of means."

No one knows yet how lively the rush for divorces will be. In the first two weeks of operations about 5,500 persons visited regional offices seeking assistance. An estimated 20,000 called for application forms and are trying to get their free law by mail. About 80 per cent of the applicants are trying to straighten out matrimonial mix-ups.

**Forms Are Complicated**

There is no close supervision of lawyers, as there is of doctors in the health plan.

There is one catch to the divorce proceedings, however. The application forms are so complicated that many applicants are unable to make heads or tails of them.

In fact, the forms of applications for free legal aid are so intricate that some persons have employed attorneys to have them completed properly. Paying to get something free seems incongruous, so the government says it is going to do something about the matter.

Just what, no one is sure yet.

### Australian Worker Offers Self As a Raffle Prize

SYDNEY, Australia—Ricky Field, 25, has offered himself as a raffle prize.

He plans to sell 1,000 tickets at one pound ($2.24) each. And the holder of the winning ticket gets the use of his services in ny capacity except crime for 12 months.

Field, who reports he is softhearted and good-tempered, plans to give 12½ per cent from the sale of tickets to charity. That will leave him just over 700 pounds ($1,600).

To make sure he isn't worked to death, Field is including in the contract that he'll only work a standard 40-hour week.

"I can do timber cutting and fencing, and I've sat under 36 cows morning and night. I can cook, too," he said.

Just to be sure he doesn't get sold down the river, Field is getting a lawyer to draw up a contract. He's got everything figured out, even if the winner is a woman.

"Supposing it's a woman and she feels she doesn't want me around. She sends me to the Snowy river hydroelectric project for 12 months.

"She collects my wages, less the camp allotment. She doesn't even pay tax on me—that comes out of my wages.

"Or, maybe a woman will want to use me as a gardener."

The young bachelor—and bachelors are at a premium in Sydney—hasn't mentioned what he's going to do about it if a winning female claims him for a husband. Or, perhaps, he'll work that out in the contract, too.

### Boy, Dropped by Santa, Receives $500 Settlement

ST. LOUIS, Mo.—Santa dropped 4-year-old Gary Lee Roberts on his head and had to shell out $1,000.

Gary's parents, Mr. and Mrs. Austin J. Roberts, filed a suit for damages against the store. They said the incident had shattered Gary's faith in Santa.

The boy was dropped while he sat on Santa's lap discussing a pop gun, tinker toys and similar important subjects.

A court ruled that Gary was correct in putting his trust in Santa. The judge said he hoped a $1,000 award, $500 to Gary for the bump on his head and $500 for his parents, would convince him that there was a Santa.

### QUICK PROOF

For a short winter, just sign a note this fall payable next spring.

### SCHOOLING "DEADLINE"

The Veterans Administration is warning veterans that the opening of the coming spring school term will be the deadline for most veterans to enter, or re-enter, schools under the GI bills. The law says veterans discharged before July 27, 1947, must begin their courses by July 25, 1951. This includes most World War II veterans.

### HIGHEST SCORN

Radio writer returned to his suburban home the other day to find his seven-year-old son brawling with a contemporary, "You get away from me," the home-ground child was saying. "And you stay away, you—you—you SPONSER!"

### FEDERAL JOBS

The Civil Service reported that civilians working in the executive branch of the Government numbered 2,160,000 on December 1, an increase of 31,500 over Nov. 1, mostly in the Defense Department.

### THE SECRET IS OUT

"I wonder why Scotsmen are so good at golf."

"They realize that the fewer times they strike the ball the longer it will last."

### NOT FAST ENOUGH!

"Isn't it wonderful? Man can now travel swiftly on land, air and water."

The only drawback is that his creditors can too.

### HOW NONSENSICAL

"Didn't that lawyer know you were a movie star?"

"Hadn't the least suspicion. Why, he offered to get me my divorce without any publicity."

By no alchemy can we get golden conduct out of leaden motives.—Spencer.

## Cowboys

### Boy Says They're Myth

HOUSTON, Tex.—A Baltimore boy says cowboys are just a myth.

Richard Carl Anderson, 12, came west to see cowboys, and, pardner, he is plumb disgusted.

"I didn't even see anybody wearing cowboy boots," he complained as he sat in probation department headquarters.

Richard's trip to Texas—inspired by cowboy shows on television which he now regards as "fakes"—was an unannounced affair. With $20 in his pocket, he came by bus from Baltimore. He was found wandering around a bus station, his money gone.

Detectives telephoned the boy's father who said he would come to take his disappointed son back east.

## Tiny Pocket Counter Devised for British Atomic-Bomb Defense

LONDON, ENGLAND — Britain's civil defense corps will soon be issued a small radiation counter that looks like a fountain pen and is small enough to carry in your pocket.

The new counter, called the individual dosimeter, comes equipped with a clip for holding it in a breast pocket.

The wearer can keep a constant check on whether he is getting too hot with atomic rays for continued health. The total dose to which he is exposed is recorded. The reading is taken by holding the small cylinder up to the light and peering into one end. Against the light, there is visible a scale reading of radioactivity.

Two other counters will also be issued. One is the portable dose rate meter, about the size of a portable radio receiver, and it also differs in what it tells its operator.

While the fountain pen device tells the total dose he has absorbed, the portable dose rate meter measures the amount of radioactivity the operator would absorb in one hour in a contaminated area.

These portable meters are battery operated, and may be carried slung over the shoulder. A flick of a switch gives the dosage rate reading on a dial.

The portable meters are designed for rescue workers after atomic blasts. These workers need to know what areas are still too "hot" for them, and how long they may remain in areas still showing weak atom contamination.

The third device, the contamination meter, is for more stationary use. It will be used principally to detect persons contaminated by bomb rays. It is planned to install it in hospitals and cleansing stations.

The meter can scan a person who merely walks by it. If that person is contaminated, a meter reading swings upward and a loud-speaker squawks.

Contaminated persons thus can be quickly separated from those who are not. The meter then can be used to show which parts of a victim's person are most contaminated.

## Postman Who Stole Stamp, Set for Jail, Is Freed

SAN FRANCISCO — A mailman who stole a 3-cent stamp was freed in a federal court, but was discharged from his job.

Frederick Gambrell, 50, appeared in court expecting the maximum sentence of six months. But the judge was curious to know why he had stolen a stamp after serving the post office for 29 years.

"I've got no excuse," he said. "I don't know why I did it."

Then he told how as a mail pick-up man he sometimes kept loose stamps that fell off letters. He was caught taking a stamp recently and discharged.

Gambrell said he, his wife and their two children lived in a cheap hotel because they had heavy medical expenses. His son is blind.

"But we lived within our means," he said. "I never meant to cheat anybody."

The judge asked the government prosecutor to dismiss the charge. The prosecutor suggested a conviction for the record, then probation.

"The record is less important than this man's life and his family," the judge snapped. "Case dismissed."

## Helpful Neighbor Gives Car a Push—Over Cliff

HASTINGS, Mich.—Cleave Strow was having trouble on a recent Sunday morning starting his automobile.. His neighbor, Leonard L. Wiley, was glad to help out and give him a push.

Wiley began to push Strow's car, the bumpers locked, and both automobiles went over an embankment.

Both vehicles overturned, but neither driver was hurt.

## Billy Maloney, 4, Objects When He Gets a Draft Call

GREEN ISLAND, N. Y.—William D. Maloney, Jr., 4, received his draft card recently. The draft board classified Billy as 4-A, meaning he had seen previous service in the armed forces.

Billy's father served in World War II and he received his 4-A card several months ago.

As for Billy, he loudly declared: "Don't wanna go in the army."

Nation's railroads rush additional cars to meet shortage.

# Mad World Has Many and Varied Problems

"It is a mad world, my masters!" says a character in one of Shakespeare's plays. The Bard of Avon died centuries ago, but that particular observation is 100 per cent timely now.

We are now engaged in a conflict with a nation which was our ally a few short years ago, the Soviet Union. At the same time, there is more and more consideration of the possibility of rearming and enlisting as new allies the principal nations against which we fought the greatest war in history, Germany and Japan.

So far, Germany has shown small enthusiasm for this idea. A joke which has been making the rounds in that torn and battered country goes like this, "In another war, the United States will furnish the air force, Britain will furnish the fleet, France will furnish the ground troops, and Germany will furnish the war criminals." Every evidence indicates that the majority of Germans hate and fear the Russians. But, at the same time, they have little love for the Western occupying powers. They are a proud people and it is probable they would willingly rearm and take up martial ways again only if their country was freed and given full standing in the company of nations.

Japan presents a different situation and a different problem. There the occupation has undoubtedly been more successful than anywhere else. One may or may not like MacArthur and his policies and attitudes, but it cannot be denied that he has obtained results. He has been greatly aided by the cooperation of the Emperor. In Japan, emperor-worship has existed for thousands of years, and it exists today in almost as pure a form as ever.

Where do the people of Japan stand in the current world conflict? There is a militant communist party in Japan, but it seems to have made small head-way. The age-old Japanese tradition is authoritarian, but it represents an entirely different philosophy of authoritarianism than does communism. If the present Japanese Prime Minister, Shigeru Yoshida, is correct, Japan is "definitely and irrevocably" on the side of the free world.

Mr. Yoshida writes in the January issue of Foreign Affairs, "We are ready and anxious to join, do our full share and make sacrifices, if necessary, in any arrangement for international cooperation under United Nations' auspices to ensure the security of the Pacific as well as Japan." He writes further that the differences in aim between democracy and communism are "absolutely irreconcilable" and that "any attempt at appeasement or compromise on the part of the free nations is unthinkable."

Japan ,of course, wishes a peace treaty—technical state of war still exists between her and 49 other countries. Mr. Yoshida points out that the Soviet Union has refused consent to a treaty, and urges a separate peace with the 44 nations outside the present Russian orbit. And here he makes this observation: "We do not know what will be the conditions of peace. This is a treaty Japan will conclude as a defeated nation for the first time in her history, and it is likely to prove a bitter pill for us to swallow. But we are prepared to take our punishment."

Japan has been 100 per cent disarmed. But Japan is the key to the Pacific, and it is very possible that she will again be made into a military power. And there is one interesting fact in this connection; Japan is the only modern nation which has defeated Russia in war, even though that war was a small one by today's standards and was concluded with a single great naval engagement.

Lieut. Gen. Alfred M. Gruenther, No. 1 assistant to General Eisenhower in Europe, is being groomed as the next Army Chief of Staff.

**NOTICE TO DEBTORS AND CREDITORS**

THE STATE OF TEXAS
COUNTY OF RANDALL

To those Indebted to or Holding Claims against the Estate of Harvey McConnell, Deceased:

The undersigned, having been duly appointed executrix of the Estate of Harvey McConnell, deceased, late of Randall County, Texas, by Judge Burney Slack, Judge of the County Court of said County, on the 30th day of December, A. D. 1950, hereby notifies all persons indebted to said estate to come forward and make settlement, and those having claims against said estate to present them to her within the time prescribed by law at the office of J. D. Barker, Canyon, Texas, where she receives her mail, this the 30th day of December, A. D. 1950.

Mrs. Harvey McConnell,
Executrix of the Estate of
Harvey McConnell, Deceased.

**CONTRACTOR'S NOTICE OF TEXAS HIGHWAY CONSTRUCTION**

Sealed proposals for constructing 7.599 miles of Grading, Structures, Base & Surfacing from east end SH 217 to Southeast 7.6 miles on Highway No. PR 5, covered by R 534-1-1, in Randall County, will be received at the Highway Department, Austin, until 9:00 A. M., Jan. 24, 1951, and then publicly opened and read.

This is a "Public Works" Project, as defined in House Bill No. 54 of the 43rd Legislature of the State of Texas and House Bill No. 115 of the 44th Legislature of the State of Texas, and as such is subject to the provisions of said House Bills. No provisions herein are intended to be in conflict with the provisions of said Acts.

In accordance with the provisions of said House Bills, the State Highway Commission has ascertained and set forth in the proposal the wage rates, for each craft or type of workman or mechanic needed to execute the work on above named project, now prevailing in the locality in which the work is to be performed, and the Contractor shall pay not less than these wages as shown in the proposal for each craft or type of labor, workman or mechanic employed on this project.

Legal holiday work shall be paid for at the regular governing rates.

Plans and specifications available at the office of W. V. York, Resident Engineer, Hereford, Texas, and Texas Highway Department, Austin. Usual rights reserved. 45t2

**INSINCERITY**

We are living in a world of insincerity. There is hatred and oppression encircling it.

Many countries of the world are over-jealous for control and their method of gaining control is by lying, cheating, persecuting, and destroying.

Our generation is very much in danger of the tyranny of these peoples. It is up to us to make this a suitable world in which to live. Truthfulness, honesty, and rehabilitation are the only answers to a warring world.

Our first job now is to be true and honest to our friends, teachers and parents. By doing this at home and by cooperating with our government we are certain to bring peace to a peace-loving people.

**WON'T SOMEBODY, PLEASE?**

Listen, everybody, for it is a strange tale that I have for you! One might call me a voyager, and then one might not, but here is my story anyway.

My journey began at the school store where I joined a school-boy. Then we went to town, and on to the college. Not stopping long at any one place, we soon had toured the whole town. I thought that at any minute, fate might catch up with me, but not until our return to school did this happen.

Then, sure enough, he reached into his pocket, and pulled it—me, a lonely chewing-gum wrapper. He chewed my contents and then threw me down. Now I am so sad, for I do not want to muss the lawn. I mar the looks in front of the building when I am around.

Please, throw me into the wastebasket, then I will be happy, and the school lawn will look nicer too!

## Senior Vignette

A future farmer and a future doctor make up this week's Senior Vignette. They are John Brandt and Sammie Pond, natives of Canyon.

John, the future farmer, says his best liked subject is farm engineering and his favorite pastime is watching Billy Morton play basketball. His ideal person is Mr. Ray Schultz and his hobby is "just running around." He likes cherry pie and vanilla cokes.

Reading is Sammie's hobby and her favorite subject is plane geometry. She plans to go to college to study in the medical profession. She likes fried chicken and milk and her ideal person is Miss Oleta Mae Pond.

## Eagles Enjoy Double Wins

Coach Murray's Eagles enjoyed victories over the Happy Cowboys Friday night, Jan. 12, and the Hereford Whitefaces Saturday night, Jan. 13 in the Canyon gym. These wins leave the Eagles with 13 wins to 3 losses.

The Eagles downed Happy 41-29 in a hard fought battle. The halftime score was Canyon 20, Happy 18. Led by Burrus, netting 12 points the second half, the Eagles glided to victory. Burrus led the scoring with 20 points.

In the "B" game Canyon slipped by Happy 38-32. Ratliff led the scoring with 15 points.

Canyon dumped Hereford 78-55. Accounting for most of Canyon's scoring were Busteed 18 points, Burrus 15 points, and Williams 13 points.

Canyon won the "B" game with Hereford. Ratliff led the scoring with 10 points followed by Dawdy with 8 points.

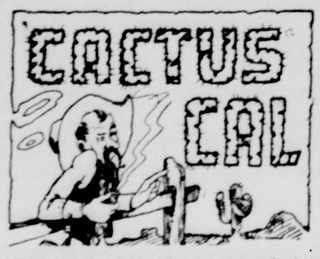

Friday night, Jan. 19, in the Canyon gym, the Eagles play host to the Stratford Elks.

## Elementary Group Presents Concert

The Canyon Grade School Band, assisted by the Girls' Clarinet Trio and the Girls' Twirling Corps, presented a concert to the fourth, fifth, and sixth grades and approximately thirty parents.

The band, under the direction of Mr. Herman Demus, presented six numbers by Buchtel, and the clarinet trio played a selection by Yoder. Sherma Dixon, junior student of Canyon High School, presented her twirling group in two numbers: "Step by Step March," by Bell, and "Fire Drill March," by Johnson.

Nothing but an echo can get the last word with the wife.

Old Cal has been wandering around the halls at CHS, peeping into the class rooms, and watching in the cafeteria, and my, my, what sights he did see!

What really knocked by eye-balls out were the cute, little haircuts on some of the boys Some of the most attractive (?) were on Robert (Clem) McClendon, Sterling (Clancy) Cummings, Richmond (Loverboy) Payne, and Donald (Mac) McDonald. Derned if I wouldn't get one myself if I had some hair!

In one class just before the bell rang, all of the boys began making "moos" like cows and tried to make the teacher think it was Barbara McDougal. They would point to her with the most innocent expressions on their faces! I overheard some of them talking, "Yeah, Barbara's calves are nice."

I heard some of the senior boys talking at noon. Seems they're going to start digging caves in Palo Duro Canyons to avoid the draft. It may not do you any good, Fellas, the day I was down there it was awfully windy!

Sure enough, about that time the bell rang, and Cal had to run to avoid being trampled, but you can bet your boots that he will be back next week!

## Fool Yu Tu

Remember, "the hand is quicker than the eye." The students of CHS found this magician's motto very true, Monday, January 8, when Loring Campbell, master magician, visited Canyon.

With a winning smile and a few fascinating tricks, he soon won the students' interest. His tricks, such as the "Mystery of China" given to him by a Chinese magician called Fool Yu Tu, held the students spellbound.

A dangerous, yet interesting trick in which Mr. Campbell used his student assistant, Don Beck, somewhat frightened the assembly. Mr. Campbell had with him a pint-sized guillotine with two openings. Into the top one he placed Don's shaking hand. Into the lower opening he placed a carrot. With a sudden smash, the blade came down on Don's hand and the carrot. Much to the surprise of the audience, Don's hand was uninjured while the carrot was cut in half. A huge applause was the reward for the trick.

Mrs. Campbell was along and of course she was in the show. She and her puppet, "Suzie" conversed about school and Suzie's boyfriends, particularly "Curly" Slack who had been winking at her. Being an average girl, she liked all boys and hated school. Her favorite subject, other than boys, was recess.

Mr. Campbell then had the audience help in making a watch disappear. The assembly was to say "Go" after he counted three. When they said the magic word, Mr. Campbell left. Thus ended a very enjoyable forty-five minutes.

Mr. Campbell started his study of magic at twelve and at nineteen was a professional. He has appeared with his show in all the forty-eight states as well as Mexico and Canada. Mr. Campbell is not just a mere magician, but an excellent entertainer as well.

## Student's Friend—An Ideal Teacher

"The dullness of English is on the student's part. None of it is dull to me."

An instructor of English at CHS for the past nine years, Mrs. Cecil Simms's accomplishments are many. Perhaps thes most glowing tribute is the submittance of her name to "Quiz Kids" as one of America's most outstanding teachers, but with twinkling eyes she declares, "No teacher is perfect. 'It's mighty easy for a fellow to let faults creep into his character.'"

Each day holds amusing and gratifying experiences for Mrs. Simms, and she is well known for a jovial sense of humor which makes the class period fly. We love her for the ability to laugh with us at our own and her mistakes and help us to profit by them.

The most enjoyable part of her work is reading term themes written by the pupils, for in that manner Mrs. Simms gets to know the personalities of her students and know them as friends. She also enjoys hearing poetry recitations and seeing them applied to our lives.

Friend and teacher to almost every Canyon student in his high school career, Mrs. Cecil Simms will always hold a warm spot in the heart of those who have known her and received a love of life's finer things through her instruction and example.

## A Letter From The Editor

Dear Staff:

A new semester calls for a new staff. One with fresh ideas, unusual vigor, high hopes, and willingness to attack the job before them with a little more experience behind them than the old staff.

We, the first semester staff, realized at once our incapabilities and set out to learn all we could about our new course, journalism. We learned how to write news, features, editorials; to read our paper with a critical attitude; to experiment with modern styles to keep our paper up to date; to ferret out news from sources previously overlooked.

Best of all we learned to work together and to accept our share of the responsibilities of a never ending race against the deadline. I found each person willing to try his hand at any new job which appeared. Whenever I suggested a change or an addition, I found help on every side.

To me as editor this meant a great deal. It meant a paper filled with news, humor, serious features, and snappy editorials. It meant that we were not failing in our efforts, but instead that we were ready to try a new phase of journalism.

Since words cannot express my gratitude to Mr. Wooten, Mr. Miller, Mr. Reeves, Miss Payne, and all the faculty for their encouragement and pushes needed to keep the staff and me going from time to time, I will just say "Thanks." If it had not been for the understanding of these people, the Eagle's Tale would have been in dire circumstances, indeed.

To Barbara McDougal, next semester's editor, I leave all my headaches and worries as well as a willing and able staff, a co-operative administration, a wonderful faculty, and a file filled with empty folders.

Sincerely,
Bettie Slagle.

## Highlights of 1950

When we look back on 1950 at Canyon High many sweet and some not so sweet thoughts come to mind. Another year, a year of joys, a little work and a lot of fun is left behind. Some activities outshine all others.

Beyond a doubt the most outstanding event of the year 1950 was the Eagle's winning the state championship basketball game. The team did not only play great but were a great bunch of guys. The 1950-51 football squad played a hard season with little experience. They showed remarkable spirit and good will. We shall remember both these teams when we think of 1950.

Class parties are always looked forward to but a few are worth looking back to. Was it the sophomore skating party, the junior swimming party, maybe the freshman ping-pong game, and card playing party, or the senior dance. Who can say; but, surely each class would insist that its party was best.

For those who labored so hard over the lines of the junior plays, this paragraph is dedicated. The Class of '50 presented "That Brewster Boy" on February 28, 1950 and the Class of '52 gave "The Fighting Littles" on December 6-7, 1950. Only one who has worked with them knows the hard work mingled with fun, then to the final thrill of opening night. Memories that will never die are created during play practice.

The FFA boys will remember the awards that they worked so hard to get. Star Dairyman and Farmer, First in District in Senior and Junior chapter conducting contest and President of area organization are some of the awards.

The FHA girls will remember the hot dog making days, the square-dance party, the hayride. But most of all they will cherish the companionship they shared with other girls of mutual interests.

The band members will remember the long tedious hours of practice before the fine concert they presented. The band not only practiced long and hard for concerts but they spent much time on the hot dusty fields marching. They took second place in the band contest at the college.

## CHS Choir Will Sing For PTA

The Canyon High School choir, under the direction of Mrs. Laverne Sifert, will present the entertainment for the meeting of the Parent-Teacher's Association, Thursday, January 18.

Some thirty-five high school student-members will sing "The Cherubim Song," "I See Your Face Before Me," and "Without A Song."

This is the choir's second appearance this year. The first was in December when a Christmas program was presented to the student body.

**AMAZING FACT**

One of the marvels of this age is achieving greater horsepower with fewer horses.

## Paper File Reveals Names

Does anyone know Fleas Graves? You Tellum Cone? Slaughter-house Tomlinson?

No, this is not a police call for notorious criminals! The above are merely a few of the awe-inspiring inscriptions found in a wooden file in the journalism room.

This interesting box, in which copies of each Eagle's Tale are kept, has been penciled and inked with names (?) of editors and staff members from as early as 1938.

Lee Roy Moreland, who is now employed in the in the local post-office, was dubbed a matty batty moron during his journalistic years. W. J. Wooten, son of Superintendent E. A. Wooten, was known as Grade Newses. Little Foo Dickerson is a brother of a Canyon High sophomore. Dean Nicholas, a brother-in-law of Mr. T. L. Devin, was a senior staff member in 1941, and KGNC's Stuart Condron, a one-time CHS journalist, decided it was easier to radio announce than to develop a "nose for news."

By the way—who's Shot-gun Hunter?

## High School Band Presents Concert

A concert by the Canyon High School band was presented Thursday, January 11, at 8:00 p. m. in the Canyon High School auditorium.

The program started with "The New Colonial March" followed by "If Thou Be Near" and "On the Range . . . A Medley of Western Melodies." The Clarinet Quartet, which consists of Jo Ann Mickey, Patsy Vandergriff, Charles Miller, and Joe Dickerson, played "Minuetto." The entire band followed with "Wanting You" and "Little Norwegian Suite." "La Petite Suzanne," a trombone solo by William O. Latson was next. The closing numbers by the entire band were "Clancy Lowered the Boom" and "The Footlifter March."

Mr. Demus has two future concerts planned which will be given February 15 and February 27.

## Eagle's Tale Jump Ahead

The Eagle's Tale is one jump ahead of the State Department in regards to a gossip column.

At the beginning of the school year, the Eagle's Tale staff changed Cactus Cal to a humor column. There was an uproar of disapproval from the student body.

Recently the staff has received a pamphlet from the Interscholastic League Press Conference, University of Texas, at Austin, urging all high school papers to eliminate the gossip column. The staff changed Cactus Cal because gossip is not news. The staff wanted only news in The Eagle's Tale. Gossip does not represent the student body, because a gossip column requires no thought, and there are plenty of students in high school who can think.

The State Department's recommendations for elimination of the gossip column are:

1. At best, the gossip column only hurts feelings, at worst it can be much more dangerous.
2. It is rare for any gossip column to come out without stepping a little on someone's toes.
3. Occasionally the gossip column steps on the wrong toes and produces not hurt but angry ones.

"Times have changed, and with them the attitude the school press has toward gossip columns. A decade of so ago gossip columns were accepted as a usual part of the school paper, and you'll find the old pamphlet dealt with means of making the gossip column as safe and interesting as possible. Now, however, progress of school journalism in Texas has brought the gossip column into comparative disrepute. School papers have become more and more advanced in their handling of news, and the quality level of these papers has climbed. Progress is leaving the gossip column behind."

## Former Teacher Speaks to F. T. A.

A teacher's methods are sometimes absurd!

In his speech to the D. A. Shirley F. T. A. Club Monday night, January 8, Mr. Herschel Thurston told of the way in which he corrected some students during the time he taught school.

Some freshmen girls were in the chemistry laboratory making stink bombs on April Fool's Day. Mr. Thurston, with the help of an assistant came in the locked door, surprising the girls. He then proceeded to line the girls up, slapping a paddle on a desk to make a firm impression upon them. He then let the most timid girl paddle the most vigorous girl and then if the girl whipped thought she had not had enough was to whip the other girl. By the time the punishment was over, the girls were almost enjoying themselves.

Mr. Thurston's teacher that made the best impression upon him was a teacher that had only one law, "Do right," which was inscribed on the plaster at the front of his room.

Twelve members were initiated in a candlelight ceremony at the home of Mary Ann Sloan. Following the ceremony, there was an informal visitation period with lime jello punch, sandwiches, nuts, and homemade mints served by Mary Ann and Bettie Slagle, a guest.

## Eagles Dump Tulia 52-39

With Ray Burrus netting 16 points in the first half, the Eagles soared to victory over the Tulia Hornets 52-39 Tuesday night, Jan. 9, at Tulia. The half time score was Canyon 20, Tulia 16. The Eagles went on a scoring rampage, led by Morton with 12 points, in the second half to win by a good margin. Burrus left the game with five fouls in the fourth quarter but had managed to get enough points to lead Canyon's scoring with 22 points. Busteed and Morton were next in the scoring with 12 points each.

In the "B" game Canyon smashed Tulia 47-19. Canyon led at the half by the comfortable score of 22-6. In the second half Canyon scored 25 points to Tulia's 13. Ratliff led the scoring with 17 points, followed by Wimberly with 12 points.

**OLD RELIABLE**

"I'm thinking of applying for a job in the weather bureau."

"What qualifications have you?"

"Oh, I've a couple of pretty reliable corns."

**GOING TO THE DOGS**

Visitor: "Poor fellow. I suppose you were tempted and fell."

Convict: "Yus, lidy—tempted by a 'andbag, an' fell over a perishin' dog!"

Who owns the mountains? The man who has a deed to the land? Rather, the man who appreciates the mountains.—McConnell.

**LACONIC**

She (to her now beau): Mother wanted to know what position you hold at the bank.

He: Teller.

She: Why, no. I really don't know myself.

**NOT YOU!**

Gunner: Do you know, honey, if I had to do it all over again, who I'd marry?

Wife: No, who?

Gunner: You.

Wife: Oh, no you wouldn't.

**NO COLLISIONS**

"You say you never clash with your wife."

"Never. She goes her way and I go hers."

**THE ORIGINAL**

Customer: "I notice you're using chicken in your chicken salads."

Manager: "Yes, the price of pork and veal has gone up."

Any fool may write a most valuable book by chance, if he will only tell us what he heard and saw, with veracity.—Thomas Gray.

The only use for a time-table today is to tell how late the trains are.

## Rheumatic Fever Start at Early Age May Affect Heart

Rheumatic fever is serious because it may affect the heart, said Dr. Geo. W. Cox, State Health Officer. Age is important. Rheumatic fever usually begins in childhood at about age 5 or 6, although adults may have it. There is a susceptibility to the disease which causes rheumatic fever to be more common in some families than others. The other factors which may favor its onset, combined with an individual susceptibility, are frequent chilling, damp or overcrowded living quarters, and a poor diet.

It is also known that one attack of rheumatic fever does not protect a child from future attacks as, for example, one attack of measles does. On the contrary rheumatic fever tends to recur. Repeated attacks are more likely to damage the heart. It is not communicable as chickenpox and measles are, and there is no danger of catching it by being in contact with a child who has it.

The physician is the only one whose judgment can be relied upon in this matter, and his directions should be followed exactly, no matter how well the patient feels or how slight the attack.

Good nursing is important for rheumatic fever patients. In communities which have visiting nurse service, a visiting nurse can give help of great value to the patient and to the doctor.

The child who has had rheumatic fever, with some degree of heart damage, should not be coddled but should be led to enjoy his home and school life, just as other boys and girls do. While it is important to provide the child with healthful surroundings and to encourage him in healthful living habits, harm can be done by overemphasizing the physical handicap.

If serious heart damage exists, and his activity is limited, he must learn to stay within these limits, but even children whose activities must be rigidly restricted because of a severely damaged heart can have a wholesome interest in life and enjoy many of the pleasures of their more active associates by the intelligent planning of understanding parents, teachers, and physicians. However, rheumatic children do need special help in choosing a life-work which will give them the best chance of avoiding recurrences of acute infection.

With care in choosing work and play, people with rheumatic heart disease, even many with severely damaged hearts, can live reasonably active and useful lives.

ATOMICOMBS

## Hew Archive In Mountain

NEW MEADOWS, Idaho—Lyle C. McDermott's "atomic-proof" archive is being built in a mountain of stone in central Idaho.

McDermott got the idea in 1938 from work at Rushmore Memorial Park in South Dakota. Although atom bombs were far from his mind then, he thought such a repository was needed to protect valuable papers, microfilmed documents and works of art from the ravages of time and excessive handling.

Although he applied for a patent for construction of the archive in 1938, it was not issued until March 11, 1941. Actual work on the project was started this year. McDermott admits that the atom bomb has given it an added boost of necessity.

The first "gallery" for storing valuables will be ready in a month. Additional storage vaults can be built until the huge mountain is completely honeycombed.

**Safe From Bombs**

The mountain of rock along the Little Salmon river was selected because the spot is far removed from any military area and large metropolitan centers, McDermott said. However, it is easily accessible by a modern highway and telephone. Safety of the repository is enhanced by the sheer cliffs that rise 3,000 feet from the river bed.

An Idaho corporation—Archives of Time Foundation, Inc.—was organized to finance the construction and administer the project. McDermott, who has a controlling interest in the foundation, plans to finance the construction work through endownments, gifts to the organization and rental of space in the archive to various individuals and concerns. He estimates an endowment fund of 3.5 million dollars will be needed for maintenance.

The first step in constructing the archive was to drill into the rock a distance of 50 to 100 feet from the initial display room. A workman's tunnel is being drilled into the mountain at a bisecting angle until it reaches a distance of 10 to 30 feet from the gallery tunnel. Then both tunnels will parallel each other into the heart of the mountain.

**Will Have Many Rooms**

At spaced intervals, lateral passageways will be drilled between the two tunnels to provide gallery space in which valuables can be stored. McDermott explains that, through use of the two tunnels, work can be progressing into the core of the rock mountain while valuables are being stored.

The archive can be used to keep business records much in the same manner as those kept in storage vaults of banks. Models of buildings, works of art, important government and historical documents, religious treasures and other valuables can be placed in the galleries so they can be viewed by visitors.

McDermott said the stone treasure chest would be able to withstand atomic bomb and other man-made weapons of destruction.

The initial display room will be about 100 feet by 50 feet. As needs warrant, additional storage vaults and display rooms will be built into the interior of the mountain. McDermott says the archive will grow as capacity is needed.

## Irma, Formosa's Big Pig, Dies for Mercy Goddess

TAIPEI, Formosa—Probably the biggest pig in the world was sacrificed recently near the capital of Nationalist China to Kwangyin, the Buddhist goddess of mercy.

Robert Shekks, chief of the United States information service in Taipei, named her Irma.

Irma weighed about 1,300 pounds, was more than six feet long and stood more than three feet high.

Her height was difficult to measure because she could not stand up the last three months of her life. She lay on her side and wheezed painfully.

Three-quarters Berkshire, Irma had been growing for 26 months, fed primarily on soybean cake, sweet potatoe vines and middlings from rice.

Irma had become one of the most talked about personalities in Formosa. Trucks and chartered buses climbed laboriously from the central plain to the 1,500 foot hills where Irma lived on the farm of Chen Ching-yuan.

Chen said that after the first announcement about Irma appeared in Taipei newspapers, 10,000 persons had crowded into his farmyard to see the pig.

## Sailor Flies 1,376 Miles To Return Front Door Key

LONDON, England — The British navy allowed a seaman, C. Templer, to fly 1,376 miles to take his mother the keys to the front door.

Mrs. Bella Templer had been working in Israel and her son was on a mine sweeper in the Mediterranean. The son had the only keys to their home.

Mrs. Templer decided unexpectedly to fly home. She cabled her son. The boy explained to his majesty's navy authorities his problem. He could air mail them, but couldn't be sure they would arrive in time. The navy granted him compassionate leave to return them himself.

The good woman cannot tell a lie—unless it's ours.

THE AMERICAN WAY

## Look At It- - - - - - This Way

There could be no better way to finish a glorious football season than by saluting the boys, coaches, and the school itself. Harold V. Ratliff, Texas sports editor for the Associated Press, has done that better than I could—and it's such a tribute to the Panhandle as a whole that I feel it deserves reprinting here.

"The general view of football fans these days is: 'We know somebody has to lose but it sure better not be our team.'

"It is a day of high pressure football when the coach doesn't know whether he will have a job tomorrow or be trying to hang on as stadium janitor.

"Time was when a season of seven victories and three losses was quite all right. About the only pressure came on that big game—beating that Thanksgiving Day rival.

"Now the coach has to win them all. A record of 9-1 is mediocre.

"What can a coach do away from pressure football?

"There are a few places where you don't have to win to draw your pay-check, but it must be admitted they are far between.

"West Texas State College is one of them. Certainly the folks like victories and who doesn't, but it isn't considered a world-shaking event when one isn't forthcoming. And the coach is surveyed from more angles than just how many games he can win.

"To West Texas State went big Frank Kimbrough in 1947. It was a dismal season at Baylor when the material didn't warrant victories but the fans and some of the officials thought there should be some anyway.

"Kimbrough had had some good teams at Baylor. His first season was 1941 when he fashioned one of the greatest upsets in Southwest Conference history—that 7-7 tie with Rose Bowl bound Texas. It is talked about to this day. In 1942 Kimbrough won six, lost four and tied one and had the team in the race for the conference title until the last weeks.

"Baylor had no football in 1943 and 1944 and had to do a vast rebuilding job when Kimbrough returned from the service. It was tough going and in 1946 there was little cooperation given Kimbrough as he tried to whip green material into a team able to hold its own in the tough Southwest Conference.

"His 1946 record was one victory and eight losses. So he resigned. Certainly it was under pressure. He was fighting a hopeless situation.

"And so to West Texas went Kimbrough. They didn't expect him to win all the games, didn't think he should take high school boys and lick the world.

"But Kimbrough crossed them up. Without pressure and demands for a winner he gave them a winner anyway. He won seven games and lost four. The next year he won six and lost five.

"The 1949 season was one of the most remarkable in his coaching career. The Buffs won the first game but lost the next four because both of his linebackers were out with injuries. You know there isn't an army of footballers at West Texas in the first place.

"But the Buffs recovered and swept home with four straight wins, including a decision over Hardin-Simmons. The sports writers thought so much of the great comeback that they picked Kimbrough as 'Coach of the Year' in the Border Conference.

"Morris Frank, the Houston wit, kidded Kimbrough the night he got the award. 'Well, as soon as Frank got his brother John in as an official, he started winning those games,' Morris quipped.

"Which of course, was all in fun. Frank Kimbrough won those games because he was a fine coach who, when he had the men, could stand up against the best in the country.

"Then came 1950 and Kimbrough's golden year. The Buffs won the Border Conference championship and in so doing beat Texas Tech for the first time in 20 years.

"There just isn't any way the sports writers can get out of naming him coach of the year again.

"But the moral of this story is: Coaches can win without the pressure. Each is a craftsman who has pride in his trade. He'll work just as hard without pressure as with it and he'll do a better job.

"Frank Kimbrough has done the kind of job the high-pressure boys couldn't touch. But he's the same fellow who coached at Baylor; he was just as good a coach then as now. The difference is the school and the attitude of the fans."

## Pheasants Got Reds Instead

WITH U. S. FORCES IN KOREA—Major Edward Burke thought it would be relaxing to go out and hunt a few pheasants and forget about the war for a few days.

His expedition was described briefly on a bulletin board for correspondents in an army public information office. The feat was neatly packaged in four sentences by some public information officer or an enlisted man. The bulletin read:

"Memorandum for the press. Maj. Edward Burke of Fayetteville, N. C., a member of the 52nd field artillery battalion, 24th infantry division, took time off from combat to go pheasant hunting. He flushed a pheasant and let fly with a shotgun. Result: 10 North Korean soldiers with hands in the air, who were escorted to a POW camp. Burke missed the pheasant."

## Blind Man Builds Home for Himself And Crippled Wife

HARRISBURG, Ill. — William Harper, a blind carpenter, built a five-room cottage for himself and his crippled wife.

Without help he had installed the plumbing, wiring, hardwood floors and wallboard, just as he had done in the construction of six other buildings.

"The blueprints are in my head," he said. "I worked out every detail so carefully in my head that I don't need my eyes."

He lost his sight at the age of two in an attack of scarlet fever."

Harper said he called in a mason to help with the foundation, and he had to have some help nailing on the roof because "it makes me a little nervous to climb any more, but I don't know why."

"On the other houses I built, my wife used to hand the wallpaper," he said, "but I had to get someone else this time."

Otherwise, every beam was cut and every screw was put in place by the blind man himself.

"The hardest part is putting in the window frames and sashes," he said. "It's tedious work. Sometimes I worked at night, because it's all the same to me."

Harper said he has had lots of experience. He built one other house near here, two others at Kinmundy, Ind.; two more at Salem, Ind., and a filling station at Salem.

Harper makes his living as an evangelist at revivals or by playing a guitar and singing on the streets. He has two living children, 10 grandchildren and two great-grandchildren.

He likes to putter around with the car his wife drives. He doesn't trust mechanics.

"I'm thinking up a way to fix it so she can drive with one leg," he said.

## Scientists to Search For Sea Serpent, Fish

NEW YORK, N. Y.—The Gothenburg Trade and Shipping Journal reports that a group of Danish experts will soon lower the world's toughest magnetometer into the greatest ocean depths.

Dr. Niels Arley, an atomic scientist, will lower the magnetometer into the Pelagic abyss off the Philippines in an attempt to verify the theory of earth magetnism recently evolved by the British Nobel prize winner, Dr. P. M. S. Blackett. The theory is that earth magnetism is developed thrugh the earth's rotation.

In addition, according to reports of the journal, another attempt will be made to catch one of the mysterious blue fish once believed to have died out 75 million years ago. One specimen of the fish was caught in 1938 in South America. Unfortunately the fisherman killed and cleaned it—thus invalidating it for serious study.

Finally the expedition will take quantities of herring as lure in an attempt to verify the 70-year-old French admiralty report of a giant sea serpent in the Bay of Along, in Indo-China. The prehistoric monster was reportedly sighed by two French gunboats — whose shells frightened it off without killing it.

## Town Startled as 'Dummy' Shell Explodes at Drill

RICHMOND, Va. — Virginia guardsmen were holding artillery practice recently. A "dummy" 75 millimeter shell was slammed into a demonstration weapon and the lanyard pulled.

A terrific explosion shook the building.

Gaping holes appeared in two walls of the building. Glass from more than 100 windowpanes began flying in all directions. A shower of plaster and dust descended on the surprised trainees.

Along 17 blocks of the city startled residents ducked for cover. Four home owners ran outside and found their front porches missing.

The projectile finally clattered to a halt in the middle of a busy intersection, but did not explode because the shell carried no charge in its head.

The mystery of how the supposedly "dead" projectile happened to get mixed in with ammunition issued for "dry run" drills is still unexplained. A full investigation into the matter is underway.

Stuttering linked to parental anxiety over speech development.

## Stockholders of Corporations Are Many in Number

What is a stockholder? Is he a man rich beyond the dreams of avarice who, in company with a handful of other men on the same stratospheric economic level, owns and enjoys the fruits of American corporate industry?

That idea still has credence in some quarters, but it is a piece of fiction far removed from the prosaic truth. A typical stockholder is the neighbor next door, the druggist on the corner, the doctor who treats your child for whooping cough, and the man who fixes your car when it begins to make strange and ominous noises.

For example, take one of the corporations listed on the New York Stock Exchange. It has nearly 1,000,000 stockholders. Of these, more than 250,000 people own from one to five shares—$150 to $750 worth at recent market prices. And not a single one of the 1,000,000 stockholders owns as much as one-half of one per cent of the company's stock.

Or take an automobile manufacturing company, with 400,000 stockholders. A third of them own less than $1,000 worth of stock.

So it goes, down the long list of listed securities on exchanges all over the country. Stockholders are, literally, millions of people—15,000,000 to be more or less exact, and the number is constantly growing. It is obvious that the great bulk of these people have average incomes—the really rich, despite the cries of the socialists and communists, are a mighty rare commodity. They are people who have put aside a part of their earnings and invested it in the concerns which provide us with goods and services of every kind—the concerns which keep America strong and powerful and vigorous.

**Good entertainment from beginning to end "THE JACKPOT" starring James Stewart, at OLYMPIC Thursday-Friday.**

### DISEASE ATLAS

The Navy has just produced a new atlas, in color. Instead of showing bays and harbors and ocean currents, this atlas gives medical students and doctors charts to the course of various diseases through blood, bones, and other tissues of the human body. Taking six years to produce, the Color Atlas of Pathology is said to be the finest of its kind in the world.

## Principle Above Politics Needed

In these days when American history seems to be stressed less than foreign political doctrines in many quarters of our land it is a good time to take stock of men who helped make this nation great and who put principle above politics.

For a moment think about Benjamin Franklin who was born January 17, 1706.

A brief summary of as versatile an individual is impossible. He was a fearless printer and publisher. His services to America in England and France rank him as one of the heroes of the American War for Independence and as the greatest of American diplomats. Almost the only American scientist of his day, he displayed remarkably deep as well as varied abilities in science and deserved the honors enthusiastically given him by the savants of Europe. His experiment with the kite, proving lightning an electrical phenomenon was performed in 1752. But little could Franklin realize how electricity would be developed to become the greatest force on earth.

Yes, it is high time we rededicate ourselves to recognizing great Americans and the blessings our own country offers in free speech, free press, free religion, free opportunity and the right to own property.

### FLUORIDATION

A cut of almost two-thirds in the cost of putting fluorine into drinking water in an effort to prevent tooth decay may result from a discovery by Dr. F. J. McClure, of the National Institute of Dental Research, U. S. Public Health Service. Another cheaper fluorine compound, sodium fluosilicate, may be just as effective as sodium fluoride, now being used. Sodium fluosilicate, which contains more fluorine, costs about four and one-half cents a pound, as compared with 10 cents a pound for sodium fluoride.

**LAUGH and RELAX see "THE JACKPOT" starring James Stewart at Olympic Thursday-Friday.**

### PLANT "ALUMNI"

Plants, on the verge of expansion to take care of defense orders, are turning to their files of former employes as "gold mines" in recruiting skilled workers to fill jobs created by mounting defense requirements. Polling of "alumni" to determine how many are interested in re-employment in the event of a severe labor shortage will provide a manpower pool for future needs.

### BEEF GRADES

Beginning the first of the year, the nation will be using new beef grade standards. The present grades labeled prime and choice will be combined into one grade called prime. The present grade of "good" will be changed to "choice." The high quality young beef now in the "commercial" grade, under the new standards will be graded "good."

### RECORD HARVEST FOR '51

The Government's crop production goals for 1951 will call for at least ten per cent more food, livestock feed and fiber commodities than in 1950. The 1950 harvest was 126 per cent of the 1923-32 average, compared with the record of 137.5 per cent in 1948 and 132 per cent in 1949. Much of next year's increase will be sought in cotton, wheat and corn.

## Statehouse

by HUGH WILLIAMSON

Casual visitors at the Capitol sometimes get the notion that senators and representatives are loafing.

Especially during this first part of a legislative session, the lawmakers will not likely be on the floor of the House and Senate many hours per day or many hours per week.

The truth is, however, that view from the spectators' galleries is deceiving.

At this stage, most of the Legislature's work is done in the members' offices.

Long, thoughtful work must go into the preparation of bills before they are presented on the floor. Later, these bills will be sent to committees, to be carefully studied. Many ill-advised pieces of proposed legislation are killed in the committees, and never get to the floor of Senate or House.

Experienced observers of the Legislature's work are studying the committee appointments, made in the House by the new Speaker, Reuben Senterfitt of San Saba, and in the Senate by Lieutenant Governor Ben Ramsey of San Augustine.

A man who knows the members of both houses personally, and is familiar with their records, can come near to predicting accurately how they will stand on any given bill, and thus what chance a bill has of passage.

When the committees begin meeting, there will be open hearings on bills. Interested citizens will come and express themselves for and against the many issues now being discussed.

Because of the great number of bills that will be introduced, and the widespread interest in many of them, many committee hearings will be held at night.

The Legislature's timetable is to complete its work in 120 days—but this session is likely to last much longer. This does not mean that the members are dawdling. After 120 days of the grind, they will be tired and they will want to go home. Besides, their pay drops, after four months, from ten to five dollars a day.

The reason for their staying longer is to get the job done.

Summing it all up—the Legislature's work is complex, difficult, and trying. This business of the State of Texas is negotiated under conditions that are often adverse.

Lobbyists, for example, will make all kinds of demands for the persons and interests they represent. Members will get letters from their home districts. On some questions, their constituents will be of divided opinion. The letters must be answered courteously and tactfully.

Texans who are unfamiliar with legislative problems and procedure are sometimes quick to criticize what their lawmakers are doing—or are not doing.

But a longer look at the House and Senate will reveal that the members of these bodies put in long hours of hard work trying to solve problems that sometimes seem impossible.

Where would you go, for example, to look for $110 million?

That's the amount of new revenue the state must have during the next two years—if the present rate of expenditures is to continue.

## *Slaton Objects To Being Taken Into Lubbock Section*

According to the Slaton Slatonite, all of the deposits in the Slaton bank were taken into the Greater Lubbock financial district.

While Amarillo claims Canyon and Randall county as a part of the Greater Amarillo section, the bank deposits still belong to Canyon.

It is proposed in Amarillo that Borger be included in the Greater Amarillo section in order to beat Lubbock on population.

Why not start a Greater Canyon area and take in both Amarillo and Lubbock?

**MOVIE PUZZLE**

When you observe a man weeping at a talkie, you can't tell whether he has a sensitive heart or sensitive ears.

Rene Pleven, Premiere of France: "The best arms and materials will be useless unless they are used by men who have belief and confidence in their task."

**ALREADY TRAINED**

"Does your husband expect you to obey him?"

"Oh, dear, no. You see he's been married before."

**GOING DOWN**

"Why are you so late?"

"I fell down stairs."

"Well, that shouldn't have taken you long."

"There is one place where a woman thinks she shines."

"I know — on the end of her nose."

**ATOMIC-POWER**

## Sub to Cost $40 Million

NEW YORK, N. Y.—An atomic-powered submarine, of which the first would cost an estimated $40,000,000, or about four times that of present fleet-type submarines, might be capable of extending greatly the operational range while completely submerged, and at speeds greater than of surface operation, K. A. Kesselring said in a speech before the American Society of Mechanical Engineers.

Kesselring is assistant head of the engineering division of the Knolls Atomic Power Laboratory, which the General Electric Company operates at Schenectady, N. Y. for the Atomic Energy Commission. The laboratory is now devoting its major effort to the designing, and later the construction, of a shipboard atomic power plant for the U. S. Navy. One application of this plant is expected to be in submarines.

He pointed out that even though the snorkel breathing tube, introduced in World War II, now makes it possible for submarines to remain submerged for far longer periods than formerly they are still tied to the surface since their diesel engines must be supplied with air. The atomic submarine, however, could cruise completely submerged, for periods limited only by the air requirements of the crew, said Kesselring.

**Would Reduce Weight**

It could be designed for underwater cruising as the normal operation, he pointed out. Thus the hull design could be altered to improve its hydraulic characteristics so that, for the same amount of power delivered to the propeller shafts, its submerged speed would be even greater than it could do at the surface, said Kesselring.

"In addition," he added, "full-speed underwater operation would be possible for extended perios reckoned in days rather than in minutes. And since the submerged speed could be enough to bring all surface vessels within its range, the submarine would become a wolf that could go after its prey, not, as in the past, a spider that must wait for its victim to approach.

Instead of increasing the amount of machinery, said the G-E engineer, atomic power might actually reduce the weight of the craft's power plant. The dead weight of atomic fuel for an extended cruise would be negligible. Even the heavy shielding needed around the atomic reactor, for protection of the crew, might be less than the heavy fuel tanks and batteries in conventional submarines, said the speaker.

"Another factor," he continued, "is that the ratio of time on patrol to time in the water becomes so high that the number of submarines required becomes appreciably less. This is extremely important in view of our submarine fleet of 170, compared with the Russian of at least 350, and the average construction time of close to two years per fleet-type submarine."

**Will Use Atomic Reactor**

Kesselring revealed some general facts about the submarine reactor being developed by the Knolls Atomic Power Laboratory. It will, he said, use an atomic reactor, operating at very high temperatures, to produce heat. The heat, in turn, will be transferred from the fuel to a liquid metal in a closed low-pressure system, and thence to a boiler where steam will be generated to drive steam turbines of standard type.

"The power delivered to the shafts," he said, "will be greater than that now provided for fleet-type units. There will be no tangible products of combustion released, and safety of personnel will be carefully maintained through the use of radiation shielding."

Anti-submarine vessels would find it difficult to locate an atomic submarine, Kesselring pointed out. They would have to use full speed in order to chase it. There would be considerable noise from their own engines and propellors and they would not have the relative quiet needed for most effective use of underwater sound locating devices, he said. In addition, the atomic submarine itself would be much more quiet than one of conventional type.

**Bit by Snake, Man Finds Wife Is a Whiz With Cures**

ATLANTA, Ga.—There's one thing that Charles A. London's doctor will agree with, his patient's wife did a lot for London when a rattlesnake bit him recently.

While he recuperated at the hospital, his condition improving, Mrs. London explained that when he dragged himself to their farm home, bitten on the leg:

"I first poured some rubbing alcohol on the bite. Then I dusted it with snuff. Then I turned up a bottle of turpentine and poured that on. Then I gave him a glass of fresh cream with powdered alum to make him vomit.

"Then I started frying eggs and putting them on the wound. As soon as one egg would get cold, I'd put another hot one on."

London credited his wife with saving his life. The doctors were doubtful about that, but they smiled and nodded assent when he said:

"She sure did a lot for me."

**King Solomon**

**SO THAT EXPLAINS IT**

Man looking at some neckties tossed one or two aside rather contemptuously. Lingering after having made his purchase, he noticed that the clerk put those he had so positively rejected in a separate box. "We have orders to keep such ties apart from the others," the clerk explained, "that is, after they have been turned down by several customers, as these have been."

"What becomes of them?" inquired the other.

"We sell them to the women who come in here to buy ties for men," was the reply.

Theodor Huess, German Federal President: "The best type of German soldier defended the ethics of his profession just as well as did the best type on the other side."

Some husbands come in handy around the house; others unexpectedly.

IT'S EASY TO OWN A BRAND NEW LEONARD

Use WHITE'S all-New 1951 ABC EASY PURCHASE PLAN

Only $5.00 DOWN PAYMENT

$12 EACH MONTH ... FEBRUARY ... MARCH ... APRIL ... AND MAY!

GUARANTEED DELIVERY IN MAY AT TODAY'S LOW PRICES!

NOT 15 ... BUT 20 FULL MONTHS TO PAY FOR YOUR NEW LEONARD!

ABOVE TERMS QUOTED ON MODEL LAC
SIMILAR TERMS ON ALL LEONARD REFRIGERATORS

MODEL LAC ONLY $199.95
LRK ILLUSTRATED $259.95

LOOK! ...Until AUGUST 1952

TO PAY FOR YOUR BRAND NEW LEONARD

NOW! just as prices are rising and many home appliances are becoming scarce ... WHITE'S offers a limited number of brand new LEONARD refrigerators for only $5 down payment ... if purchased immediately on the ALL-NEW 1951 ABC EASY PURCHASE PLAN

HURRY! ... these terms apply only to stocks now on hand!

It's the easiest way in the world to own a new refrigerator ... it's White's sensational ABC Easy Purchase Plan! White's *exclusive* ABC Easy Purchase Plan for May delivery requires ONLY $5 DOWN! You never miss the small weekly or monthly payments, and you'll have your new Leonard just when you need it most—in May!

By placing your order now, White's can insure delivery of your new Leonard in May and protect you against rising steel costs, labor costs and seasonal increases. Why risk higher prices by waiting? Why put it off until spring and then be faced with a big down payment and possible scarcity of the model you want? Place your order now!

WHITE'S A-B-C EASY PURCHASE PLAN ... Easy on Even the Most Modest Budget ... and Timed Perfectly to Insure Delivery on Your New Leonard Just When You Need It Most. *Only a Limited Number of Refrigerators to Be Sold on These Terms ... Hurry!*
